TSA failed 67/70 tests - Robbed privacy for no benefit		SUPREME: will of gov't	Rts that go against public good Not as important	Last speech: (1) values (2) exam? (3) definition
Defs: Privacy, Nat'l Sec conflict				
Res Anal: Phil approach				
V - Presumption of Innocence = innocent till proven guilty	→ Not what we should use a std 1. Need clear conflict: correlation is critical Therefore, ignore all c's			
crit: 4 th Amt Std				
c1 - 4 th Amt Std is violated Ex: NSA surveillance	2. Privacy is unlike other rts Therefore, morally ok to place priv < nat'l sec			
c2 - 4 th Amt Std bears no fruit ThinkTank: 98.2% failure rate				
c3 - Privacy must be more important Ex: USA FREEDOM Act	-----			
	V - General welfare R2Prefer: Purpose of Gov't	1. Pres of Inn is essential to Justice 2. Pres of Inn ess'l to Gen'l welfare 3. Gen'l welfare is vague	1. Necessity not = importance Ex: NEVER = yields 2 crime 2. Ignored threat (VOTER 1)	contradicting. But job > car. Ex: pack for trip, nec determines importance
	c1 - Nat'l Sec upholds gen'l welfr App: SGPc = Al-Qaeda cell Plot foiled = lives saved	→ Agree: Nat'l sec is good but... → Irrelevant: no evidence that warrant was/wasn't used	→ X → which is bigger threat? (VOTER 2)	→ Ignored still vague term
	c2 - Privacy does not uphold gen'l welfr a) Modern Luxury Friedman: "Privacy is Modern invention" b) So Last century App: Google WaPo: G is everywhere	→ 1. Privacy DID exist 2. It's a poor standard 3. Privacy shields our rights	→ 1. Havn't shown if no warrant 2. Getting 100 000 warrants shows warrants not possible → In today's world, privacy isn't used (as with Google)	→ Math? Still no #'s or stats Still irrelevant... must prove IMPORTANT! Neg no example of protected people
		→ voluntary, no compulsory	(VOTER 3) Priv is unlike other rts Therefore, priv must yield	Neg said "priv can be violated w/o crime being committed" - Priv is a right... so need warrant
