

## Ameda® Breastfeeding Products NASPO ValuePoint Price List (Effective May 1, 2018)

Ameda's mission is to empower each mom to meet her breastfeeding goals by providing clinically differentiated products and services that make her experience more comfortable, safe and convenient.

More than 75 years ago, Swedish engineer, Einar Egnell made it his life's work to help breastfeeding moms. After years of research, Egnell created the first comfortable and effective breast pump that closely mimics the sucking rhythm of nursing infants. In the process, Egnell also created the vacuum and cycling standards that have since become the industry benchmark.

All that Ameda offers - from breast pumps, breastfeeding accessories to education – reflects our mission to empower breastfeeding in hospital and at home. Ameda has been a leading innovator and has delivered unmatched quality and services to lactation professionals, institutions and most importantly to moms.
