Quest Summary Document and Fulfillment Partners

Quest Service (Q), Fulfillment Partner (FP)	Solution or Provider	Description
FP	AireSpring, Inc.	Founded in 2001, AireSpring is an award-winning, nationwide network operator and managed services provider serving thousands of businesses nationwide. AireSpring provides fully managed and connected end-to-end, next-generation solutions for multi-location enterprises including SD-WAN, AirePBX™ Cloud Business Phone System, SIP Trunking, MPLS, Disaster Recovery, Managed Security, and Business Internet. AireSpring’s services are delivered over its revolutionary nationwide MPLS Mesh network, via strategic wholesale relationships with over 20 major carriers, providing customers a fully integrated, end-to-end solution across the United States, from a single vendor.
FP	Allgress, Inc.	Allgress is a global provider of cost-effective IT security, compliance and risk management solutions for end-user organizations and 3rd party vendors. Allgress solutions allow organizations of all sizes to automate processes for the assessment, monitoring and remediation of risks with more flexibility and less complexity. Unlike other similar solutions, the Allgress patented technology permits customers to derive quicker-time-to-value without an army of consultants or the need for other applications. For additional information, please visit us at http://www.allgress.com
FP	AmpliFund	AmpliFund is a web-based grant management software for nonprofit and public sector organizations developed by StreamLink Software. AmpliFund is designed for managing every stage of the grant lifecycle, and is at the forefront of automating grant compliance and data standardization in the public sector. Find out more at www.streamlinksoftware.com/amplifund .
FP	Aspen Technology Group Inc.	Aspen Technology Group Inc. was founded with a single mission: to help our clients be the most successful, creative and customer centric providers as possible. We approach each of our clients’ business needs with fresh eyes to help develop a customized digital experience using our unique set of strategies. Let us help make your customer experience and automation vision a reality. We serve businesses locally, regionally and internationally. Our solutions include Amazon Connect, AWS Serverless, Quick Base, Jabra, Google Apps, Dynamics – O365, WordPress Hosting and more.
Q	<u>Backups as a Service</u>	Organizations with on-premises backup deployments can extend their availability strategy to the cloud. By sending backups to Quest’s cloud, customers can avoid the cost and complexity of building and maintaining an offsite infrastructure for backups and replication.
FP	Brighton Training Group	Brighton is an online training company that automates child nutrition training and tracking for dozens of state agencies and large sponsoring organizations. Our Bright Track SaaS solution is a hosted platform that includes a library of over 75 interactive online courses tailored to your state’s rules and policies.
FP	codemantra	<p>For over a decade, codemantra has been at the forefront of increasing the value of digital documents. By leveraging the proprietary platforms coupled with the latest AI and machine learning techniques, we have consistently delivered high-quality solutions and services to more than 300 publishers, financial institutions, public sector organizations, and NGOs.</p> <p>codemantra offers high quality services and software solutions that include:</p> <ul style="list-style-type: none"> • Accessibility Delivery Hub: A SaaS-based application leveraging intelligent content and process automation to deliver rapid accessibility remediation in compliance with WCAG 2.0 and 2.1 standards. A consolidation of machine learning and human-assisted oversight provides scalability for large volume projects. • collectionPoint™: A digital document management platform that delivers robust metadata management for efficient archival, search, and retrieval of documents and content discovery. A SaaS platform, collectionPoint™ streamlines the lifecycle of content with enhanced workflow management, as well as programmed packaging and distribution of content to partners or downstream systems. • Content Production Services: Full-service content production including digital document transformation, interactive content development, indexing, Alt-text creation, curriculum writing, proofreading and more. <p>Headquartered in Burlington, MA, codemantra has additional offices in London, UK and Chennai, India. For more information, please visit www.codemantra.com.</p>

Quest Summary Document and Fulfillment Partners

FP	<u>Corvid Cyberdefense</u> (formerly Rocus Networks)	Corvid Cyberdefense is a leading provider of cybersecurity solutions and services. Corvid Cyberdefense Haven™ is their fully managed prevention, detection and response security solution that integrates all the necessary controls, management, and 24/7 monitoring to protect against cyberattacks. More information can be found at https://www.corvidcyberdefense.com/ , https://www.linkedin.com/company/corvid-cyberdefense/ , https://www.facebook.com/corvidcyberdefense , https://twitter.com/corvidcyber , and https://www.instagram.com/corvidcyberdefense/ .
Q	Cylance	Cylance® is revolutionizing cybersecurity with products and services that proactively prevent, rather than reactively detect the execution of advanced persistent threats and malware. Our technology is deployed on over four million endpoints and protects hundreds of enterprise clients worldwide including Fortune 100 organizations and government institutions. CylancePROTECT is 100% predictive and prevents cyberattacks from being successful by providing a proactive security posture with higher efficacy than traditional antivirus. Don't rely on detect and respond – get the power of prevention.
FP	<u>DataEndure</u>	DataEndure (formerly Computer Media Technologies) helps companies build digital resilience so that their critical information assets are protected and available to the right people, at the right time in a cost-effective and compliant way. We take a holistic approach in architecting and delivering a data management and protection strategy that leverages the relationship of integrated and interoperable solutions to simplify enterprise environments and accomplish our customer's specific business goals. DataEndure customers are better able to manage their IT risks, respond well when information assets are threatened, and protect and access their critical company information wherever it resides. www.DataEndure.com or 1-800-969-4268.
FP	<u>NTT America, Inc.</u>	NTT Ltd. is a global technology services company bringing together the expertise of leaders in the field, including NTT Communications, Dimension Data, and NTT Security. We partner with organizations around the world to shape and achieve outcomes through intelligent technology solutions. For us, intelligent means data driven, connected, digital, and secure. As a global ICT provider, we employ more than 40,000 people in a diverse and dynamic workplace, and deliver services in over 200 countries and regions. Together we enable the connected future. We're proud to be part of the global holding company under NTT, called NTT Incorporated (Inc.) For more information, please visit https://hello.global.ntt
Q	DR as a Service	Combining protection, orchestration and automation all in one. There are no hidden costs, later discovered dependencies or lengthy custom scripts needed for recovery. Is your business more focused on protecting data than protecting applications? Applications typically span multiple Virtual Machines (VMs) and are more complex in terms of dependencies and infrastructure. They can require recovery with write-order fidelity, database consistency, and more—something most replication solutions do not supply. We can help protect, recover and set protection policies for your applications that meet your business objectives, so in your time of need you have peace of mind.
FP	<u>e-Builder</u>	e-Builder Enterprise is fully-integrated, owner-centric, cloud-based construction software focused exclusively on meeting the needs of facility owners and construction professionals. An end-to-end Project Management Information Solution (PMIS) delivering outcomes from capital planning and design through commissioning.
FP	<u>Eccovia Solutions</u>	Eccovia Solutions provides an industry-leading care coordination platform for state Medicaid agencies, ACO/MCOs, Medicaid Waiver programs, and community-based providers. Our platform helps case workers and care providers collaborate across the spectrum of service delivery to address the physical, behavioral, and economic factors that drive population health.
FP	<u>Echolo</u>	The Echolo Internet of Things Platform delivers your data from the physical world to the digital one. Our platform and network were built from the ground up to reduce the complexity of traditional systems making it easy for you to get your products to market faster. Echolo's IoT Platform offers unmatched flexibility and ease of use, at a reasonable price point.
Q	eFax as a Service	A cloud-based document process and information exchange service, Quest's eFax as a Service enables companies to automate business documents and provide full visibility over all processes with just an Internet connection and web browser. Whether you need flexibility for variations in document volume or want support for basic compliance requirements, our on-demand offering provides value to

Quest Summary Document and Fulfillment Partners

		companies seeking the highest levels of efficiency, security and control. eFax as a Service benefits include: pay for only what you use with predictable pricing models, go-live quickly with low risk and immediate scalability, benefit from 24/7 availability and access from anywhere, simplify IT infrastructure via system standardization, and meet contractual commitments thanks to scalable architecture.
Q	<u>Endpoint Security as a Service</u>	Quest offers Endpoint Security including threat detection, incidence response, vulnerability assessment, and configuration compliance. Quest also provides Endpoint Management including patch management, asset inventory, software distribution and asset utilization.
Q	<u>Enformion, Inc.</u>	The Enformion data aggregation platform integrates more than 6,000 data sources with a powerful algorithm that connects billions of records to build comprehensive profiles about US adult individuals. The data is available to end-users via three deliver vehicles: online web platform application, a published Application Program Interface (API), and traditional batch data file exchange for integration with third party applications and end-user database applications.
FP	<u>Galvanize</u>	Galvanize is the leading provider of award-winning, cloud-based security, risk management, compliance, and audit software for some of the world's largest organizations. The integrated HighBond platform provides visibility into risk, makes it easy to demonstrate compliance, and helps grow audit, risk, and compliance programs without incurring extra costs. More than 6,300 organizations in 130 countries rely on HighBond to meet their objectives, including many Fortune 1000 and S&P 500 companies, hundreds of banks, manufacturers, and healthcare and government organizations. Whether managing threats, assessing risk, measuring controls, monitoring compliance, or expanding assurance coverage, HighBond automates manual tasks, blends organization-wide data, and broadcasts it in easy-to-share dashboards and reports.
FP	<u>Gilbarco Veeder-Root</u>	Gilbarco Veeder-Root is the global leader of integrated technology solutions in the retail petroleum industry. From our reliable fuel dispensers to intuitive point of sale to revolutionary operation management systems and convenience store equipment, Gilbarco Veeder-Root delivers total integrated solutions from the forecourt to the convenience store. Insite360 is a global cloud services platform for all Gilbarco Veeder-Root technology. It provides a secure, user-friendly dashboard that allows operators full visibility of information, generated across their network of sites, from anywhere, anytime. Remote monitoring and control technology features a user-friendly dashboard.
Q	<u>Inspired eLearning</u>	Inspired eLearning is dedicated to delivering the highest quality enterprise educational products that transform corporate culture, nurture and enhance workforce skills, and deliver maximum ROI for the corporate education budget. Inspired eLearning offers Security Awareness and Compliance solutions (including HR, HIPAA/HITECH), PhishProof phishing assessment software, custom courseware design and development, content integration, and a fully hosted web-based eLearning course delivery and tracking system using the iLMS (Inspired Learning Management System). For more information, visit https://inspiredelearning.com/security-awareness/ .
FP	<u>Intelligent Wireless Sensor Networks</u>	Intelligent Wireless Sensor Networks (IWSN) helps organizations manage the internet of things (IoT), where through the use of sensors, the entire physical infrastructure is closely coupled with information and communication technologies; where intelligent monitoring and management can be achieved via the usage of networked embedded devices. In such a sophisticated dynamic system, devices are interconnected to transmit useful measurement information and control instructions via distributed sensor networks. WSNs are regarded as a revolutionary information gathering method to build the information and communication system to improve the reliability and efficiency of infrastructure systems. Compared with the wired solution, WSNs feature easier deployment and better flexibility of devices. With the rapid technological development of sensors, WSNs will become the key technology for IoT and IWSN can help you deploy and manage a system to fit your needs.
Q	<u>IT Asset Management</u>	Quest can help manage all of your IT assets. We offer end-to-end ITAM services, dedicated account teams, industry-leading tools and proven practices to help your company remain compliant and ensure your IT portfolio is fully optimized at all times. Quest ITAM Services includes retention of all contract data. This data contains all important contract facts from the reseller including quantity, license type, device count, purchase price, and contract timeframe.
FP	<u>JASK</u>	JASK is modernizing security operations to reduce risk and improve efficiency. The JASK Autonomous Security Operations Center (ASOC) platform applies advanced AI and machine learning to identify and

Quest Summary Document and Fulfillment Partners

		<p>extract data from multiple sources. Fusing data gathered with alerts from existing security solutions, JASK automates the correlation and analysis of threat alerts to deliver advanced insights based on records of activity across the network, users and endpoints.</p> <p>Advanced analysis delivers the highest-priority alerts (JASK Insights) via a simple dashboard, streamlining investigations and enabling faster response times. By ignoring the noise and focusing on the most critical activities, analysts are free to threat hunt. As new threats are identified, critical data is sent back into the JASK platform for continuous learning and application across all customer environments.</p> <p>With an entrepreneurial team, savvy data scientists and engineers with a long-term vision for risk mitigation, JASK is removing the technology gaps that limit SOC modernization</p>
FP	<u>Jive Communications, Inc.</u>	<p>Jive provides cloud-based phone systems and Unified Communications services. Jive’s customers include high-growth businesses and public sector institutions needing a scalable platform that is more flexible and cost-effective than their existing legacy systems. Jive’s cloud architecture offers an integrated, seamless experience that provides richer context and creates more efficient connections between co-workers and clients. Jive’s cloud delivery model ensures that each organization always has the latest technology, features, and applications—making Jive the last phone system you’ll ever need. For more information, visit http://www.jive.com</p>
Q	ManageEngine	<p>ManageEngine is bringing IT together for IT teams that need to deliver real-time services and support. Worldwide, established and emerging enterprises - including more than 60 percent of the Fortune 500 - rely on our <u>real-time IT management tools</u> to ensure tight business-IT alignment and optimal performance of their IT infrastructure, including networks, servers, applications, desktops and more. ManageEngine is a division of <u>Zoho Corporation</u> with offices worldwide, including the United States, India, Singapore, Japan and China. For more information, please visit buzz.manageengine.com/.</p>
Q	Microsoft	<p>Quest carries a full line of Microsoft software and peripherals including: Microsoft® Windows® XP desktop operating system, Windows 2000, and Windows Embedded operating system. Microsoft Office, Microsoft Publisher, Microsoft Visio®, Microsoft Project, and other stand-alone desktop applications; Microsoft Business Solutions, encompassing Great Plains and Navision business process applications, and bCentral™ business services; Microsoft Windows Server System™ integrated server software, software developer tools, and MSDN®; Mobile and Embedded Devices, featuring mobile devices including the Windows Powered Pocket PC, the Mobile Explorer microbrowser, and the Windows Powered Smartphone software platform.</p>
FP	<u>Morpheus Data</u>	<p>Morpheus is the first completely infrastructure agnostic cloud management platform (CMP). With Morpheus, organizations can combine all their technology onto a single pane of glass to easily manage everything from AWS to bare metal in just a few clicks. Morpheus offers IT and Dev capabilities they never thought possible: instant one-click provisioning, fast and simple database management, easy workload migration, automatic monitoring, logging and backups, dynamic management, cloud brokerage, and more. To learn more, email info@morpheusdata.com or visit: morpheusdata.com/demo, or https://www.morpheusdata.com/resource-center.</p>
Q	<u>OneSpan</u>	<p>OneSpan enables State, Local and Federal governments and agencies to succeed by making bold advances in their digital transformation. We do this by establishing trust in people’s identities, the devices they use, and the transactions that shape their lives. More than 10,000 customers, including over half of the top 100 global banks and all levels of government, rely on OneSpan's solutions to protect their most important relationships and business processes.</p> <p>OneSpan Sign was the first e-signature solution to be granted authorization to operate (ATO) under the Federal Risk and Authorization Program (FedRAMP) and our team has decades of experience implementing e-signatures in government across a wide range of use cases – both on-premises and in the cloud. From workflow and process digitization to digital on-boarding and fraud mitigation, OneSpan’s unified, open platform reduces costs, accelerates customer acquisition, and increases customer satisfaction.</p>
FP	<u>OnTrak Solutions</u>	<p>OnTrak Solutions puts you in a position to manage your vehicles and assets with maximum efficiency. Through the utilization of the latest technology, OnTrak Solutions creates a line of communication</p>

Quest Summary Document and Fulfillment Partners

		between your staff and your assets. Through this communication, you can now monitor and manage your assets in real-time - exponentially increasing productivity and responsiveness. OnTrak Solutions' offering includes vehicle camera solutions , dashcam solutions , commercial GPS tracking , and electronic driver log .
FP	Pacxa	Pacxa is Hawaii's largest information technology group providing an extensive range of end-to-end solutions for many of Hawaii's top 250 businesses, small- and medium-sized companies, and government and nonprofit agencies. Pacxa works with its clients to meet their technology needs by tailoring solutions and leveraging partnerships with industry leading hardware and software providers to improve operational efficiency and increase revenue.
FP	PastPerfect	Designed by museum professionals for museum professionals, PastPerfect offers desktop and cloud-based software that combines collection and contact management into one easy-to-use software package. PastPerfect has transformed how museums of all sizes catalog collections and manage relationships with members and donors.
FP	Pondera Solutions	Pondera Solutions offers an existing Software as a Service (SaaS) cloud-hosted solution that combats fraud, waste, and abuse in government programs ("Fraud Detection System"). The Fraud Detection System is pre-configured as well as highly customizable to your program's unique requirements. Our Fraud Detection System is currently deployed in Medicaid, Unemployment Insurance, SNAP, Tax and Revenue, Social Services, and Integrated Eligibility, across seven (7) programs, nationwide. We integrate your program data with third party data for cross-matching, validation, and eligibility analytics as well as fraud risk assessment and program participant fraud risk ranking. The Fraud Detection System includes fraud detection, case management, social media analysis, network analysis, and super search capabilities. We are able to implement your system rapidly, typically in 120 days or less from receipt of data.
FP	RingCentral	RingCentral, Inc. is an award-winning global provider of cloud unified communications and collaboration solutions. More flexible and cost-effective than legacy on premise systems, RingCentral solutions empower today's mobile and distributed workforces to be connected anywhere and on any device through voice, video, team messaging, collaboration, SMS, conferencing, online meetings, contact center, and fax. RingCentral provides an open platform that integrates with today's leading business apps while giving customers the flexibility to customize their own workflows.
FP	ROI Networks	ROI Networks is a systems integrator specializing in voice, data and video communications serving small, mid-sized and enterprise customers seeking to virtualize their infrastructure in order to reduce costs, maximize productivity and simplify their corporate networks. For more information please visit www.roinetworks.com .
FP	Smartel	Smartel has been a national leader in wireless expense management for the past 16 years and is now a complete mobility solutions provider. Our cutting-edge mobility platform allows our clients to manage all vendors, solutions and custom reporting in a single location. By managing and optimizing data usage, global usage, user/device/feature and plan inventory, we reduce our customer's wireless spend by 30% annually. Smartel is also a leader in IoT/m2m strategy and development. This includes connectivity, hardware, management and reporting. Additionally, Smartel offers MDM, Mobile Security, Fleet Management, Managed Services/Help Desk and Cloud Based Messaging
Q	Security as a Service	Quest can design, implement, and manage a comprehensive managed security solution that covers your networks, servers, databases, and applications. Full security solution management can occur on-site or from Quest's remote Network Operations Center. Key features include: <ul style="list-style-type: none"> • Anomaly detection – monitor your network for anything out of the norm to easily identify new or unexpected trends/issues • SIEM and log management combined in a centralized console • With Quest's real-time reporting, you'll be able to see how your security and compliance posture changes over time • Simplified search, filtering, and reporting • Pre-built reports and customizable policies make reporting easy • Security reporting and event and log management in one simple interface

Quest Summary Document and Fulfillment Partners

		<ul style="list-style-type: none"> Two-tier data storage – heavily-indexed historical data for quick search/reporting in addition to real-time data collection and reporting
FP	Silent Solutions Security	Silent Solutions Security LLC provides solutions for security applications in non-traditional outdoor markets. Since 2005, we have prided ourselves on our ability to assess each site as a unique entity, and provide innovative approaches to a client’s intrusion detection, surveillance, asset protection and monitoring needs. We provide integrated electronic security solutions that incorporate innovative technologies with our proven Mobile Sentry platform. Solutions include state of the art electronic security panels, wireless long range sensors, cellular communications, solar power assemblies, IP cloud video cameras with access through a central server, smart phone access for remote camera viewing, and off-site monitoring that virtually eliminates false alarms. Our ability to build a hardened wall around nearly any sized outdoor environment or project is truly what differentiates us from the traditional security providers.
FP	SkyBitz	SkyBitz, Telular’s flagship brand for IoT Telematics solutions, is a leader in commercial telematics solutions across multiple vertical industry sectors, providing real-time information on the location and status of assets. More than a thousand enterprises rely on SkyBitz technology to achieve total asset visibility, improved security, lower operating and capital expenses, and enhanced customer service. SkyBitz delivers its solution via a secure web-based application and requires no software downloads. For additional information, visit www.skybitz.com .
FP	Solodev	The Solodev CMS platform has been used by enterprises, organizations, and governments to build, manage, and power hundreds of award-winning websites and mobile apps. Solodev is an American software company based in Orlando, Florida. The company primarily specializes in developing and marketing its proprietary content management system of the same name, Solodev CMS. In 2016, Solodev released its latest software version, Solodev CMS 8, completely re-architected for the AWS (Amazon Web Services) Cloud.
FP	SpendBridge	SpendBridge provides an intuitive storefront that people want to use - inspiring a culture of efficiency. SpendBridge is a cloud-based solution that brings a refreshing new perspective to spend management across the source-to-pay business ecosystem. SpendBridge unifies all systems, producing actionable spend analysis and accurate budget information SpendBridge brings together all products and vendor catalogs into one intuitive storefront that simply works - for every user across all locations. For more information, visit www.spendbridge.com .
Q	Tanium	Tanium gives the world’s largest enterprises and government organizations the unique power to secure, control and manage millions of endpoints across the enterprise within seconds. Serving as the “central nervous system” for enterprises, Tanium empowers security and IT operations teams to ask questions about the state of every endpoint across the enterprise in plain English, retrieve data on their current and historical state and execute change as necessary, all within seconds. With the unprecedented speed, scale and simplicity of Tanium, organizations now have complete and accurate information on the state of endpoints at all times to more effectively protect against modern day threats and realize new levels of cost efficiency in IT operations. IT has 15-second visibility and control over every endpoint, even across the largest and most complex global networks. With this new level of visibility and control, new things are possible for IT.
FP	TierFive	TierFive enables companies to protect mission critical data; realize data trends and streamline existing business processes. Our focus is removing single point of failure, automating FTE utilization, business process improvement, enabling document and information sharing by applying the right technology both when and where it’s needed. Our vast industry experience and expertise enables our clients to realize cost savings and true bottom line benefit. TierFive brings decades of experience in Network Security, Data Center Design, Business Continuity, and Enterprise Content Management including Paper and Electronic Forms Automation, Document Management and Fax Automation we integrate these technologies into any business based on the unique needs of its niche or situation. Our approach is not tied to a single solution or idea we as work to understand the business problem and then apply a proven technology solution testing every solution to ensure the pieces fit together and integrate into your line of business as designed.

Quest Summary Document and Fulfillment Partners

		Regardless if our clients' needs require an ad-hoc one of type of software or a synergistic set of solutions, we help them achieve their business goals through our advanced technical and industry knowledge. In business since 2005, we've been growing and setting the pace with technology. There's nothing our versatile team of analysts, management and technical professionals can't handle. Along with full service discovery, analysis, implementation and integration services, we offer onsite training, dedicated support, and custom programming.
Q	<u>Training as a Service</u>	Quest offers Training as a Service for security awareness and compliance topics including harassment prevention, human resources, ethics and code of conduct, PCI, and healthcare guidelines such as HIPAA and HITECH. Training modules can be combined/customized to meet the regulatory needs of the organization and the participants.
Q	<u>Veeam</u>	Veeam develops backup, disaster recovery and virtualization management software for VMware and Hyper-V virtual environments and focuses on products that increase the resistance of virtualized workloads, reduce downtime, and ensure the system availability required by service-level agreements. For today's enterprises, this means that expectations for SLAs for data and application uptime can be revolutionized. Organizations no longer need to think in hours or days – they can think in minutes or seconds instead – for all applications, data, and workloads.
Q	<u>Video Surveillance as a Service</u>	IP Video Surveillance as a Service is a leading-edge technology offering many advantages you can trust to be effective, reliable, affordable, and highly configurable. IP video offers substantial savings over traditional systems and costly security guard configurations; you may be able to use your existing cameras in conjunction with current network hardware to prevent large startup costs. And now that IP video is available as a web-based or Cloud service, more organizations than ever can afford to implement IP video surveillance systems. The low monthly costs can be expensed like any other service, making the transition to IP video painless and affordable. Advantages of IP video surveillance systems include the ability to use "best of breed" IP cameras that can broadcast live anywhere in the world. Digital IP video – especially HD video surveillance technology – is vastly superior to analog video and provides the flexibility of zoom, mega pixel, pan, and adjustable frame rates that can be stored on a hard drive, network storage device, or tape backup.
Q	<u>Virtual Desktop SaaS</u>	Quest's Virtual Desktop SaaS solution provides the benefits of virtual desktops – simplified deployment, improved data security, and centralized management – without the exorbitant capital costs and unending management hassles. Quest Cloud-hosted desktops can deliver savings upwards of 36% over average physical desktop PCs and provide the ability to offload endpoint costs and extend the lifecycle of an existing PC. Quest's solution is a pay-as-you-go Cloud subscription service that requires no capital investment and leverages carrier-class scale and geographic coverage that's not available to most organizations. You can custom-configure the service to meet your end-users' performance requirements, specifying OS, RAM, CPU, disk space, and more according to particular end-users' needs. Once you're a Quest customer, your Cloud-hosted desktops can be deployed in a matter of hours, not months, with substantially reduced complexity and risk.
Q	<u>Website Assets as a Service</u>	Quest offers managed web content delivery with security enabled features leveraging internet accessibility for the dissemination of information. Based on innovative technology, our cloud hosting platform is fast, scalable, and allows you to customize your solution. It comes with 24/7/365 support. Whether you are starting a small development project or need to host a high-traffic enterprise site, Quest will provide you with the options and security that you require.
