

# EMERGENCIES DO HAPPEN

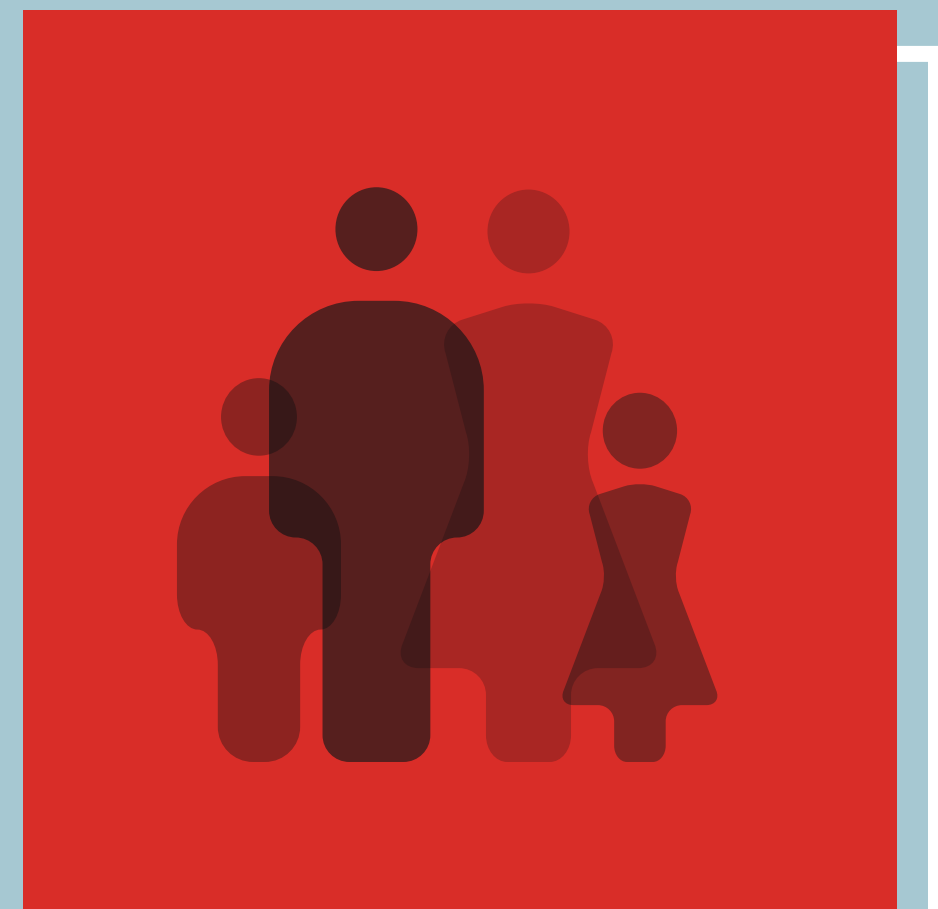

Here are some things every school, community and family should know about emergencies:

**80%** of Americans live in counties that have been hit with a weather-related disaster since 2007.

Nearly **60%** of American adults have not practiced a disaster drill or preparedness exercise at work, school or home in the past year.

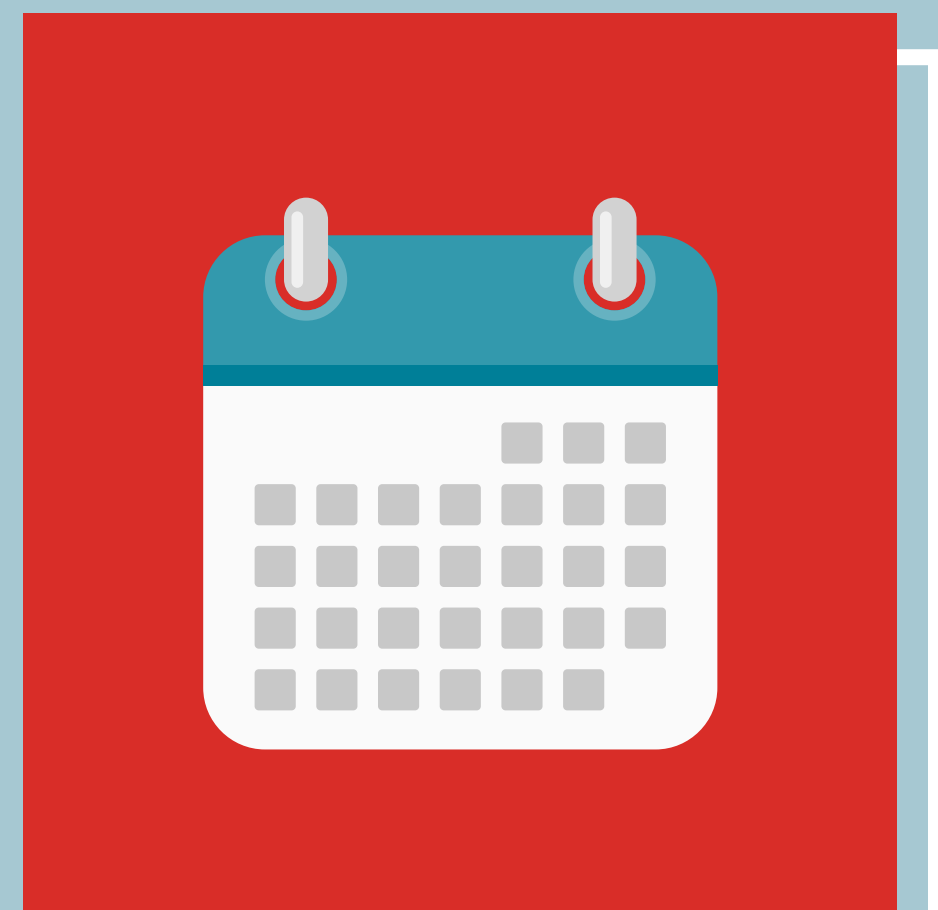

Only **39%** of Americans have developed an emergency plan and discussed it with their household.

Disasters have affected nearly **243 million people** in the United States since 2007.

An emergency preparedness kit should have at least **3 days' supply of water** (1 gallon per person, per day).

Change the food and water in your emergency preparedness kit every **6 months**.
