

**California Department of Public Health  
Center for Health Care Quality  
Healthcare-Associated Infections (HAI) Program**

**“Basics of Infection Prevention in Outpatient Hemodialysis Centers”  
Course**

**Course Description:**

Back by popular demand! In 2017 the HAI Program will be providing a 6 hour basic infection prevention educational program for facility administrators and associated staff working in outpatient dialysis facilities. The course will be held in several locations throughout California during the months of March, April, and May. There is no cost to attend however space will be limited; pre-registration is required.

This course is intended to provide an overview of basic infection prevention principles in the outpatient dialysis setting including topics such as hand hygiene, standard precautions/PPE, environmental cleaning and disinfection, BSI prevention, safe infection practices and NHSN surveillance and reporting.

**Suggested Audience:**

- Dialysis facilities quality improvement staff, facility administrators, or clinical managers interested in learning more about infection prevention strategies.
- RNs, LVNs or technicians in dialysis facilities, with infection prevention responsibilities or interest in infection prevention.

**Primary Objectives:**

1. Identify evidence-based practices for bloodstream infection (BSI) prevention
2. Discuss practices to reduce the risk of environmentally-related healthcare-associated infections
3. Review importance of proper hand hygiene practice
4. Review standard and transmission-based isolation precautions
5. Discuss the impact of unsafe injection practices on patient and healthcare worker safety
6. Discuss the importance of surveillance and use of the National Health Safety Network (NHSN)

**Approved California Board of Registered Nursing, BRN Provider number 10386 for six (6) contact hours  
Lunch not provided; brown bag lunch recommended.**
