

## QIP 3.0 Login: [www.qualitynet.org](http://www.qualitynet.org)

- **Performance Score Reports (PSR):** Report providing details on the facility's **Total Performance Score**, including clinical quality measures as relate to QIP.
- **Performance Score Certificates (PSCs):** Certificate released/posted annually in the dialysis unit where patients can view summary details impacting facility's Total Performance Score.

**Facility Point of Contact (POC)** applies for QIP access through EIDM/QARM.

- Limit of one POC per facility.
- Can be POC over multiple facilities.
- Can ask CMS Clarification Questions or submit one **Formal Inquiry** during **Open Preview Period**.

**Facility Viewer** role has read-only access to PSR.

**User ID and Password for both roles chosen during EIDM registration**

## Dialysis Data Login: [www.dialysisdata.org](http://www.dialysisdata.org)

- **Quarterly Dialysis Facility Compare (QDFC):** Contains your facility's **Star Rating**.
- **Dialysis Facility Reports (DFRs):** Summary of quality in facility using claims data as the main source. Often used by state surveyors for review prior to visiting a facility. Also used by the Network to select facilities for Network projects.
- **Preview Period Timeline:**  
[https://dialysisdata.org/sites/default/files/content/FAQs/Timeline\\_110917.pdf](https://dialysisdata.org/sites/default/files/content/FAQs/Timeline_110917.pdf)  
Any staff granted access by the MAH can comment during the **Preview Period**.

**Master Account Holder (MAH)** notifies Network of changes to facility MAH.

- **MAH Username** is the facility's CCN; Password is provided annually by the Network to the MAH on file.
- MAH must also have a **regular user account** to view/comment on DFR/DFC responsible for managing facility's **Regular User** accounts that need access.
- **Regular User:** Can view/comment on DFR and/or DFC as determined by MAH.
  - Username: User's email; Password: Created by user.
  - Account disabled annually. Must be re-enabled by MAH.

**Data Source(s): Claims Data; CROWNWeb; REMIS**

Item	Measure Name	The Facility
1	Overall Star Rating (Table 6)	*****
1	Hospitalization & Deaths tab	Average
1	Patient Survival (2012-2015, Table 1)	100 (per 100 patient-years)
21	Monthly Rate (per 100 patient-years)	11.8%
21	Lower Confidence Limit (2.5%), Upper Confidence Limit (97.5%)	11.8%
21	Classification Category	Not Exposed

**Quarterly Dialysis Facility Compare - Preview for October 2016 Report**  
DFC Dialysis Facility - Item XXX - Network: 99 - CCN: SAMPLE

**Quarterly Dialysis Facility Compare Preview:** The following table displays measures for this facility as they will appear on the DFC website. Please refer to Table 1 for more information on hospitalization (admissions and discharges), death, or transfusion, Table 2 for infection, Table 3 for vascular access, Table 4 for mineral and bone disorder and dialysis adequacy measures reported in CROWNWeb, Table 5 for patient experience of care and Table 6 for the star rating calculation. The star rating, Standardized Infection Ratio, Hospitalization, Transfusion, and Infection Rates are updated annually. Patient Survey Results are updated semi-annually; all other measures are updated quarterly. For a complete description of the methods used to calculate the statistics in this report, please see the Guide to the Quarterly Dialysis Facility Compare Report. The Guide is available on the DialysisData website at [www.DialysisData.org](http://www.DialysisData.org).

**Purpose of the Report**  
The Dialysis Facility Report (DFR) for FY 2017 is provided as a resource for characterizing selected aspects of clinical experience at this facility relative to other caregivers in this state, ESRD Network, and across the United States. Since the data could be useful in quality improvement and assurance activities, each state's surveying agency may utilize this report as a resource during the FY 2017 survey and certification process.

**This DFR includes data specific to CCN(s): 999999**

**Overview:** This report includes summaries of patient characteristics, treatment patterns, and patient outcomes for chronic dialysis patients who were treated at this facility between January 2012 and December 2015. Mortality, hospitalizations, and transplantation statistics are reported for a three- (90-day) period. Regional and national averages are included to allow for comparison. Several of the measures of patient mortality, hospitalization, and transplantation are adjusted to account for the characteristics of the patient mix at this facility. [www.esrdnetwork18.org](http://www.esrdnetwork18.org) and [www.dialysisdata.org](http://www.dialysisdata.org) as a case.
