

Section Reference	Question	Answers
Section 1 – B. RFP Schedule	The cover page lists the “Proposal Submission Deadline” as May 31st at 2:00pm. The RFP Schedule lists June 1st at 4:00pm as the closing. Which date/time is correct?	Sorry for the typo. We will honor the later date and update the RFP.
Section 2 – Attachment A	Will OETC allow vendors to bid additional imaging products such as printers?	Yes
Section 2 – Attachment A	Will OETC allow vendors to add an additional area on the price sheets for a brief overview of each product (standard capabilities, paper capacity, recommended volumes, etc.)?	Yes
Section 2 – Attachment A	Where on the pricing sheets would OETC like vendors to specify that the particular equipment that is being bid has 11 x 17 or greater capability?	On a separate document that references the products on the pricing template.
Section 3 – C. General Product Specifications	Would OETC like vendors to submit brochures or data sheets for the equipment models that are being bid?	Yes that is typical.
Section 3 – B. Customer Support	Does OETC have minimum expected service requirements from its partnering vendors (i.e. guaranteed onsite response time, equipment uptime guarantees, etc.)?	Typical responses spell this out. We would ask for clarification if a proposal did not. No minimum requirements, but the comparison does evaluate in the score.
Section 2 – Attachment A	Will OETC allow vendors to provide an option for short-term rentals?	Yes, in addition to standard lease agreements, not as a replacement.
Attachment A - Pricing Schedule	Can OETC please confirm that it is the intent of OETC to only award vendors that are able to provide products and services for all categories in the 20 ppm to 100+ ppm and a partial response would not be considered?	It isn't a per se disqualification. OETC members require providers who can serve the consortium needs, and more often than not those needs require a full suite of devices, and hence that is what we ask providers for. Those providers that can better meet the consortium's needs will score higher.
