

LAWNS AND SHADE TREES NEED AMPLE WATER NOW

While this is not an ideal season for planting lawns, they may be started successfully if given proper care and kept moist at all times, according to the Grounds Section. It is pointed out that the most important consideration is frequent sprinkling, since the young grass plants will become parched and die if the top soil is allowed to remain dry for even a few hours.

The Grounds Section also re-emphasizes the urgency of thoroughly irrigating shade trees in the Village. Where trees have been surrounded by circular dikes to form water saucers, the dikes should be six inches in height, at a radius of eight feet from the tree trunk. This saucer should be half filled with water, and the faucet then turned back so that a flow will continue into the saucer at the same rate that the water is absorbed by the soil. It is recommended that this be done for eight hour periods twice weekly.

CLASSIFIED

ROOMS

ROOM FOR RENT - Twin beds. Inquire 558-L Jadwin.

RICHLAND HOUSING OFFICE MOVED FROM BUILDING 713

The offices of the Village Organization, including Tenant Service, Facilities groups, Community Activities, and others previously located in the Richland Housing Office in Building 713, have been moved to the Municipal Building, located on Goethals Drive, northeast of the Administration Building.

TROUGH TRAFFIC NOT PERMITTED ON PARKING LOT DRIVEWAYS

Driveways leading into and out of parking compounds in the Village are being used as Thoroughfares by many drivers, according to reports received by the Richland Patrol.

Parking lot entrances and exits are not intended for use as connecting links between streets, and such use is a serious threat to the safety of children playing near the parking compounds.

RICHLAND RESIDENTS MAY GATHER FRUIT FROM VILLAGE ORCHARDS

Residents of Richland will be permitted to gather the fruit from orchards within the Village limits. Orchards in the adjacent areas have been assigned to another agency and are posted with signs prohibiting trespassing. Residents are asked not to enter these orchards.

The cherries now ripening are a very light crop, and in many instances no cherries are to be found on the lower branches. Most of them are of the sweet varieties, and the fruit is not ripe until it has turned a blackish-red.

Signs are being posted in the "Village Orchards" which are open to residents. Care should be used in picking so that the branches of the trees will not be injured.

VILLAGE TENANTS ASKED TO COOPERATE WITH PAINTERS

The application of a second coat of paint to the trim of new village houses, which is necessary to the fulfillment of the contract, has been held up in numerous cases because tenants object to the removal of sealing tape, etc. around windows.

Although the opening of windows that have been sealed does cause an inconvenience to tenants, it is imperative that the bottom of the windows be given a protective coat of paint. All tenants are asked to cooperate with the painters so that this work can be completed on schedule.

BASEBALL PRACTICE MONDAY

The Richland baseball team will hold a practice session next Monday evening, June 12, at 7:00 p.m. on the K-8Y field. All players interested in becoming members of this team are urged to attend.
