YOUR COOPERATION IS NEEDED
TO SOLVE TELEPHONE PROBLEM

Telephone facilities in the Richland area, as well as those in adjacent areas, are at present taxed far beyond their capacity. This condition is largely due to lack of equipment and of available qualified personnel to maintain and operate existing equipment.

It is a recognized fact that a considerable number of the calls routed through our telephone exchange fall in the category of "unnecessary calls". If these unnecessary calls are reduced to a minimum, or eliminated entirely, it can mean the difference between our obtaining maximum efficiency from equipment at hand or a serious breakdown of the communication system.

This message is an urgent appeal to you. The condition is serious. When you use your telephone, be brief and, in the best interests of all concerned, don't make unnecessary telephone calls.
