DINING ROOM

Situated on Deck 4, the spacious dining room accommodates all guests in a single seating. With sweeping 180 degree views, our backdrop while dining is always exceptional. Breakfasts are buffet style, while lunches offer a great choice of light meals - as well as more substantial options. Every evening an expansive menu prepared by our culinary chefs offers international options for every palette. Menus are paired with a fine selection of international wines and beverages.

OBSERVATION LOUNGE

Situated on Deck 7, immediately above the Bridge of the ship, this is one of the most popular locations for guests to gather and enjoy incredible panoramic views over the ship's bow. It's a great spot to sit with a book, or to observe wildlife through your binoculars at close quarters. This is also home to the ship's library full of reference books and wildlife guides. Afternoon tea is served here and there is a coffee/tea station available 24-hours a day. A full bar service is also available here.

CASUAL BISTRO

The Bistro can be found on Deck 5, and features a menu offering quick and easy dining options. Our popular pre-breakfast smoothie bar and tea and coffee for the early birds is available here. With 180 degree views and immediate aft access to a covered (and heated) teak deck, this is a perfect spot to appreciate the surroundings whilst enjoying a snack or beverage.

LOUNGE AND BAR

This is a wonderful space to enjoy a refreshment after a busy day of exploration. Spacious sofas and club chairs provide ample seating with exceptional views out to both port and starboard sides of the ship. With enough seating for all passengers, the lounge and bar is also utilized for daily expedition recaps and informative presentations.

SHIP'S BRIDGE

The ship's bridge is open to passengers day and night. With plenty of space for onlookers, the bridge doubles as an excellent viewing platform and a great place to watch our Captain and officers at work. This is a fascinating place to spend time and learn about navigation and ship operations. Guides will be on the bridge to assist in wildlife spotting and identification.
