1. He broke his maiden wiring the field going 9F in open company.
2. He flopped in his first start in open company v. winners.
3. He caught an off the turf race. He hates dirt.
4. They entered him over his head in a NY Stakes race.
5. He gets a 51 day refresher and gets a **DROP** and runs a good 2nd sprinting.
6. He improves OptixFIG while moving up in class despite the rider grabbing him early causing him to pull and get rank, zapping energy
7. He **WARMS UP** well and looks good on track/paddock **PADDOCK**, but he puts in a subpar effort. Was it the YIELDING turf?
8. Does he have an early pace advantage today? Do they try and wire field on stretch-out to 9F?
