

# OptixEQ Presents Enhanced OptixGRID

## Customized Filtering and New Key Data Fields

### EZ Panels for Customizing Views of OptixGRID

EZpanels **SavePanel** ✓ RunUp ✓ OptixNOTES ✓ OptixWORKS ✓ RaceCalls ✓ JockeyTrainerOwner ✓ RaceShapes ✓ PlotInfo

Click panel options to add or hide data fields and create personalized past-performance sheets. “**Save Panel**” button saves your custom preferences.

### EZ Filters for Customizing Views of OptixGRID

EZfilters **ClearFilters** CurrentYear Races last 45 days Races last 90 days Races last 180 days Races last 360 days Today SurfDist Eliminate ThisRace ONLY ThisRace

Click filter options to view surface and date range preferences. “**ClearFilters**” button returns to OptixGRID default layout.

### New Data Fields

**RunUp:** An “EZpanel” option containing three new, important pieces of information.

RU	TR	KEY
107	0	
	24	
107	0	
159	10	

- **RU:** “Run-up” displays the number of feet travelled before the official timing of the race begins.
- **TR:** “Temporary Rail” shows the number of feet the rails were moved out for that turf race.
- **KEY:** “Key Race” highlights races that have the potential to produce multiple winners. (NOTE: this feature is currently in development.)

**Age, Sex, State-Bred:**

Age	Sex	SB
6	G	s
6	G	s
6	G	s

- **Age:** Age of the horse.
- **Sex:** Sex of the horse (i.e., colt, horse, filly, mare, ridgling, gelding).
- **SB:** “s” indicates that the race was for state-bred horses only.

## Customized Filtering and New Key Data Fields

### OFR: OptixFIG Range

OFR	oFIG
-	!
101-93	89 ▲
96-88	93

- **OFR** projects the **OptixFIG** range needed to win that particular race. If the race has already run, the oFIG earned is next to the OFR. If the race hasn't run yet, you'll see an exclamation point (!). This is **extremely useful information** when trying to ascertain whether a horse is fast enough to be competitive in today's race.

### WO: Workout Info

- **WO**: In addition to the proprietary **OptixWORKS** information (workout grades, keywords, and extended comments,) there is now a workout icon displaying traditional workout information, i.e., workout raw times, rankings, number of bullets and rank average. Click on the "WO" icon, to launch the box below:

WORKOUTS - SA 17-04-14_06W GILES													
Date	02APR2017	26MAR2017	19MAR2017	16FEB2017	10FEB2017	15JAN2017	29DEC2016	21DEC2016	13DEC2016	08DEC2016	02DEC2016	25NOV2016

## Customized Filtering and New Key Data Fields

### Race Shapes

**OptixSHAPES** allows users to understand a particular race shape and interpret how that race shape might have affected the horse's performance (positively or negatively.) It provides a quick look at the early pace (O4S-sprints/06S-routes) and late pace (OfS) of the race and is based on running style and positioning during the race. Race shape descriptors range from "Very Slow" to "Very Fast."

O4S	O6S	OfS
.	.	.
F 1.1	.	F 1.1
S 1.8	.	VF 1.4

### Plot Info Added

Key **OptixPLOT** elements now included in the **OptixGRID** are:

rpm	OPloc	SDloc	Fit	q1%	SpdRt	Par
C	q4-□3	q4-□3	●	☀	13	-
C	q4-□3	q4-□3	●	☀	8	-
EP	q3-□3	q3-□3	●	❄	45	-
	q1-○0	q1-○1	●	🔥	50	

- **rpm**: "RunStyle Plot Match" displays the horse's preferred running style ("e"arly, "p"resser, "c"loser, etc.) and uses color-coding based on run-style match for Plot position (**best**, average, **poor**).
- **OPloc**: the **OptixPLOT** locator shows the previous plot position using the "Standard" **OptixPLOT**.
- **SDloc**: the **Surface/Distance** locator shows previous plot position using the "Surface and Distance" **OptixPLOT**.
- **Fit**: Fit is a color-coded metric used to determine the reliability of the Plot. (**best fit**, average fit, **worst fit**).
- **q1%**: "Contention Rating" as measured by Quadrant I percentage using a flame to represent a very contentious race, a sun to represent a mildly contentious race, and a snowflake to represent the least contentious race.
- **SpdRt**: "Speed Rate" projects the velocity of today's pace ranging from a very slow speed rate (low **blue** number) to a medium rate (mid **yellow** number) to a very fast rate (high **red** number).
- **Par**: Indicates horse's **OptixPLOT** position was above (+) or below (-) the Par line.
