

MIT's Eau d'e coli iGEM 2006

By: Robert Ovadia

Background

What makes a scent?

An enzyme that converts something that DOESN'T smell, into something that DOES smell.

JMT

jasmine

CCMT

cinnamon

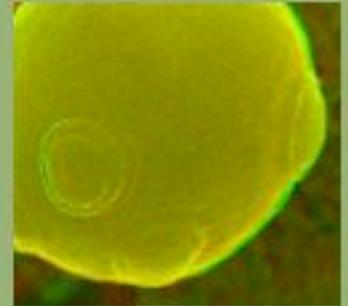

BAMT

fresh / floral

BSMT

wintergreen

ATF1

banana

- pOsmY + Inverter

Results

What I Liked and Disliked

System Design

Complex System

Background

System Design

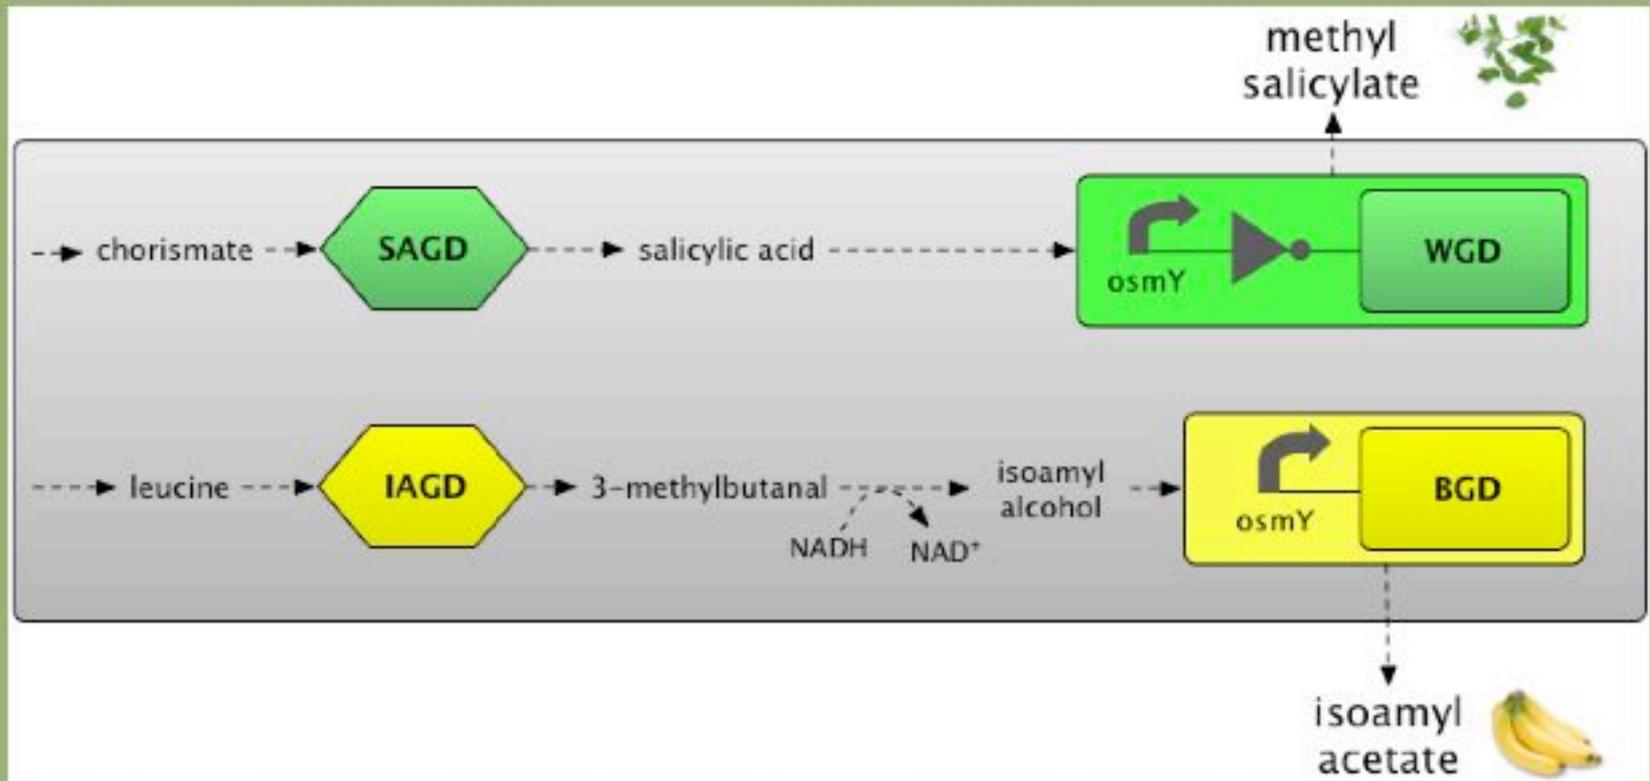

- WGD
- BGD
- SAGD
- IAGD
- pOsmY + Inverter

Results

What I Liked and Disliked

System Design

More Complex System

Background

System Design

- WGD
- BGD
- SAGD
- IAGD
- pOsmY + Inverter

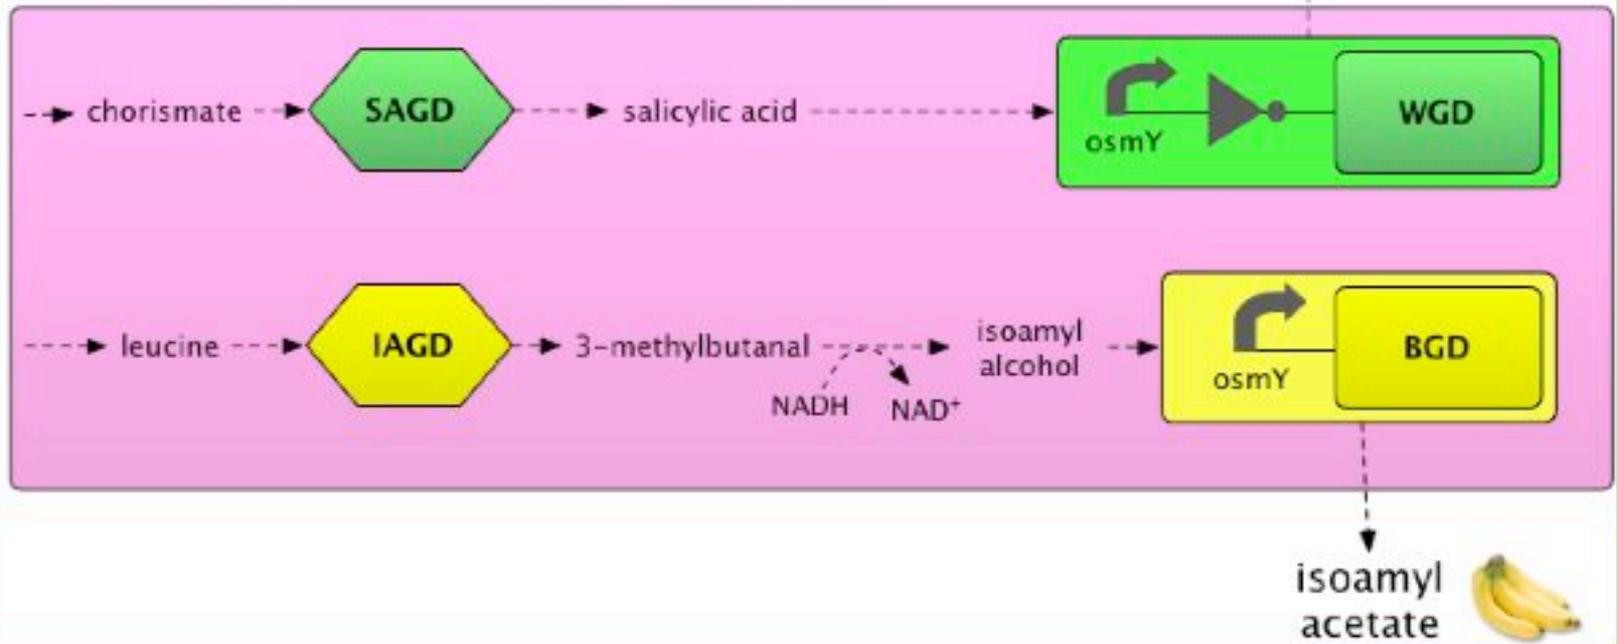

Results

What I Liked and Disliked

System Design

Complete System

indole deficient *tnaA5⁻* chassis

Background

System Design

- WGD
- BGD
- SAGD
- IAGD
- pOsmY + Inverter

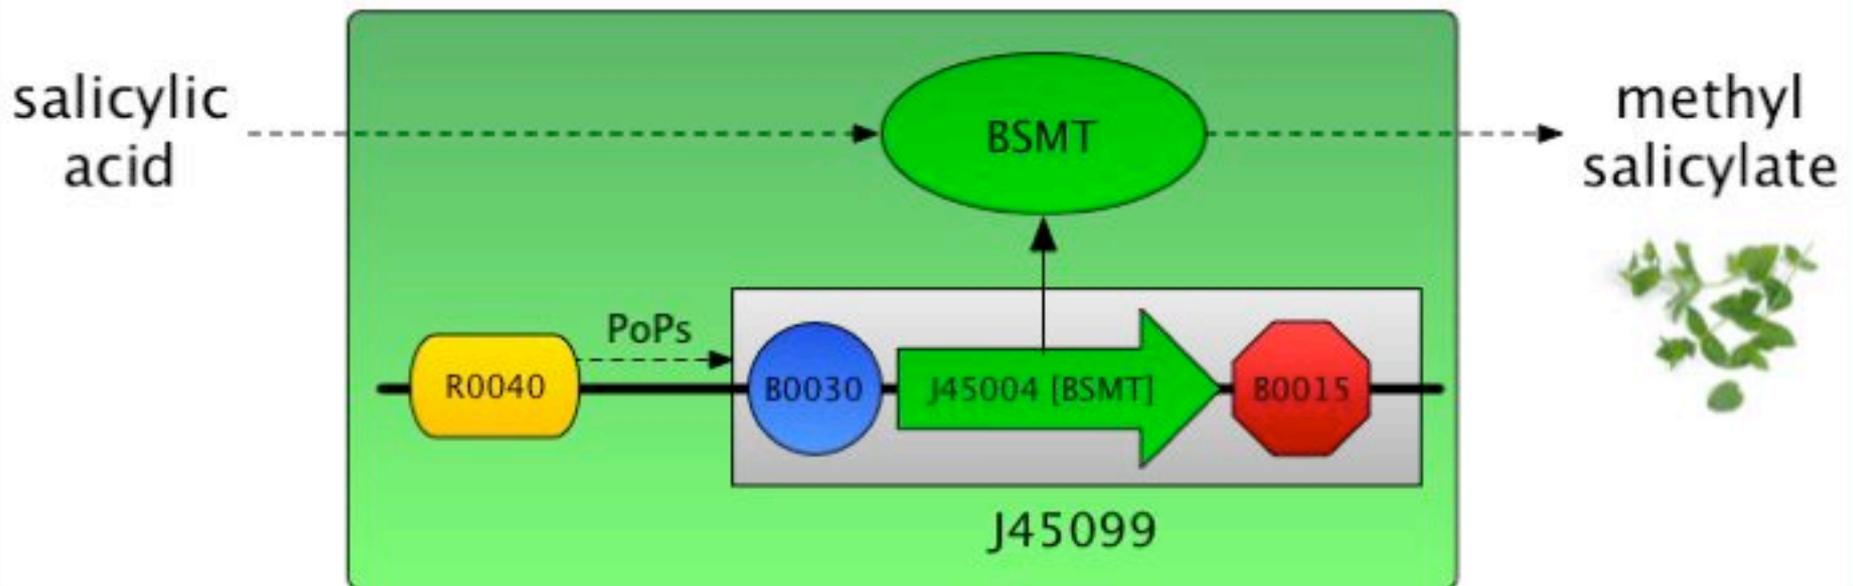

Results

What I Liked and Disliked

System Design

Wintergreen Generating Device (WGD)

J45100 – Wintergreen Generating Device (WGD)

Background

System Design

- pOsmY + Inverter

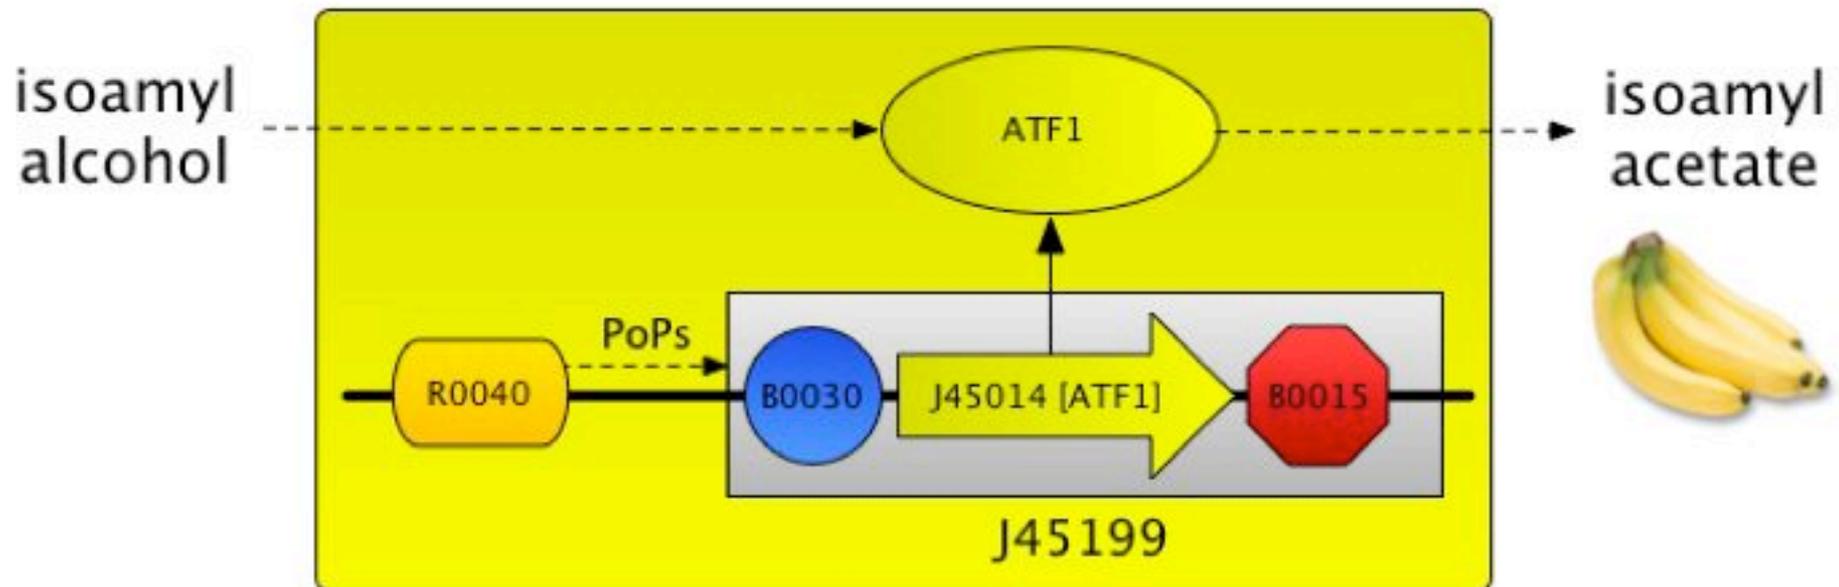

Results

What I Liked and Disliked

System Design

Salicylic Acid Generating Device (SAGD)

J45300 – Salicylic Acid Generating Device (SAGD):

Background

System Design

- WGD
- BGD
- SAGD
- IAGD
- pOsmY + Inverter

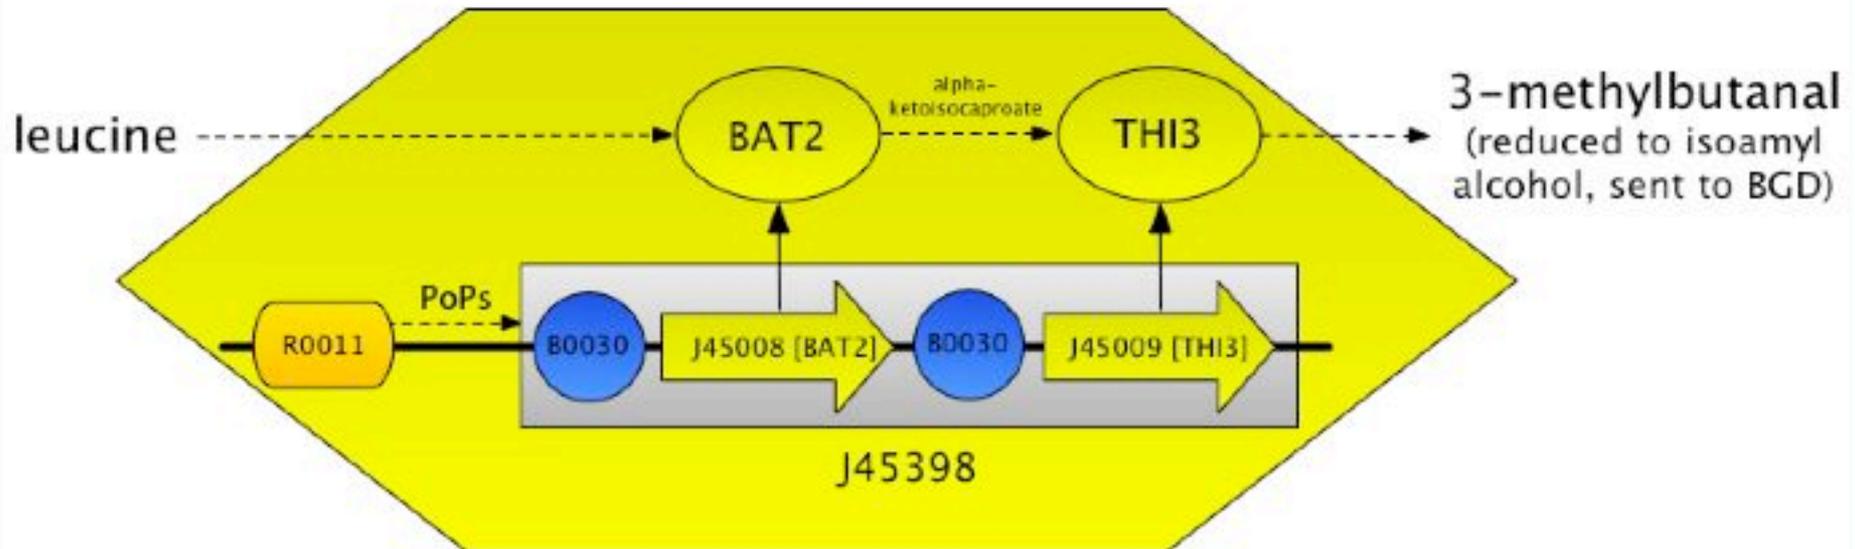

Results

What I Liked and Disliked

System Design

Isoamyl Alcohol Generating Device (IAGD)

J45400 – Isoamyl Alcohol Generating Device (IAGD):

Background

System Design

- WGD
- BGD
- SAGD
- IAGD
- pOsmY + Inverter

Results

What I Liked and Disliked

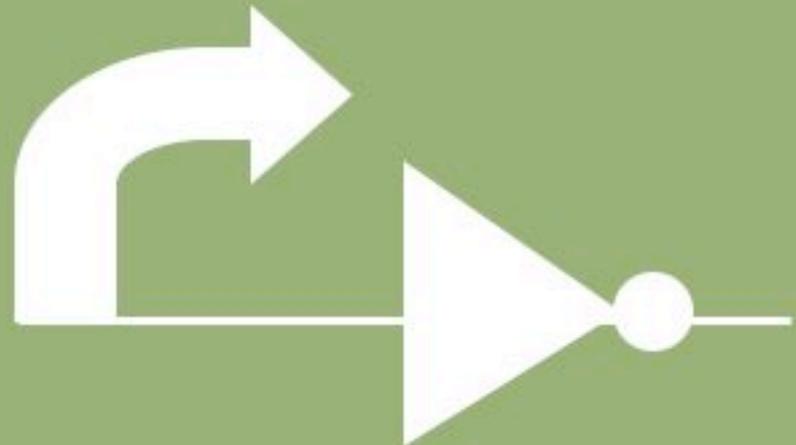

System Design

OsmY + Inverter

osmY: active in stationary phase & under high osmotic pressure conditions

osmY

osmY + inverter

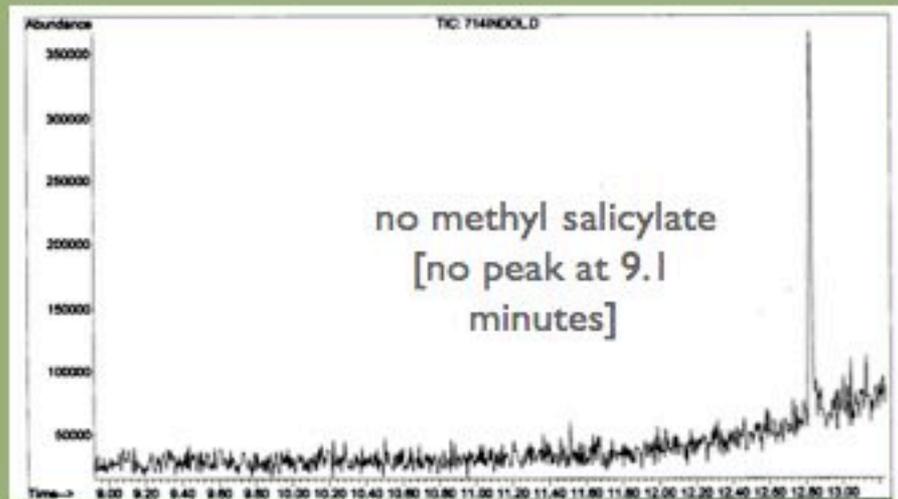

- WGD
- Growth Dependent Regulation
- Growth Dependent Regulation + Inverter
- Indole Free Bacteria
- Smell Test

What I Liked and Disliked

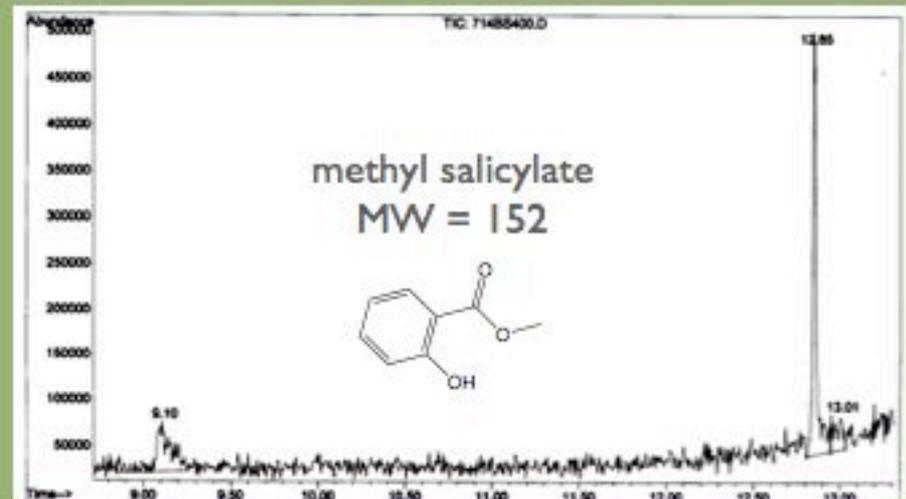

Results

Wintergreen Generating Device

E. coli

E. coli + precursor
(SA) + WGD

- Growth Dependent Regulation + Inverter
- Indole Free Bacteria
- Smell Test

What I Liked and Disliked

Results

Growth Dependent Regulation + Inverter

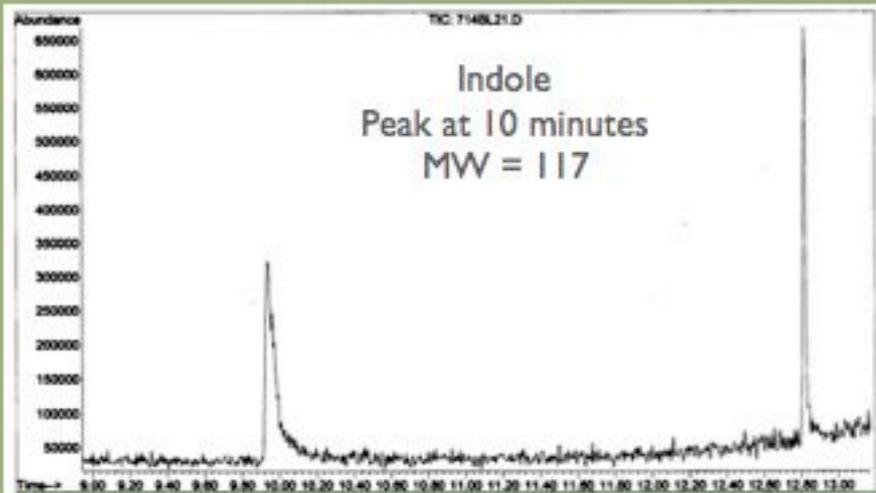

- WGD
- Growth Dependent Regulation
- Growth Dependent Regulation + Inverter
- Indole-Free Bacteria
- Smell Test

What I Liked and Disliked

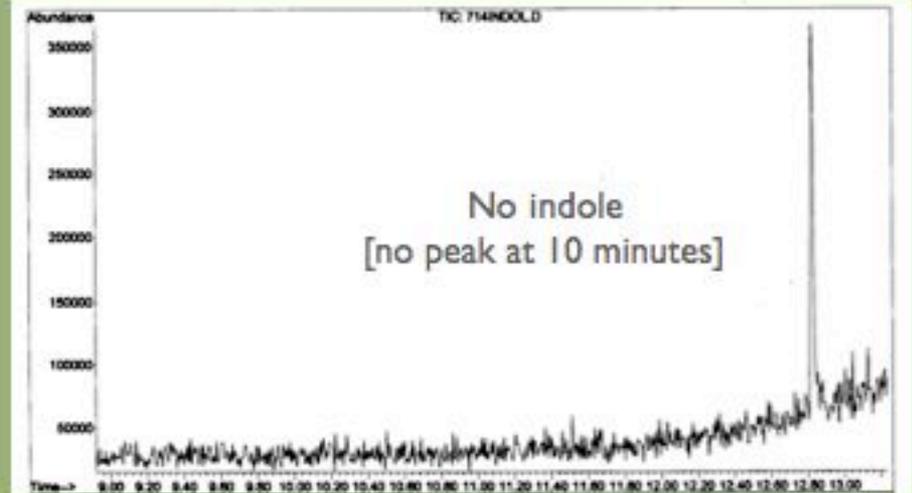

Results

Indole-Free Bacteria

wild type *E. coli*

chassis: *tnaA5*⁻ *E. coli*

Background

System Design

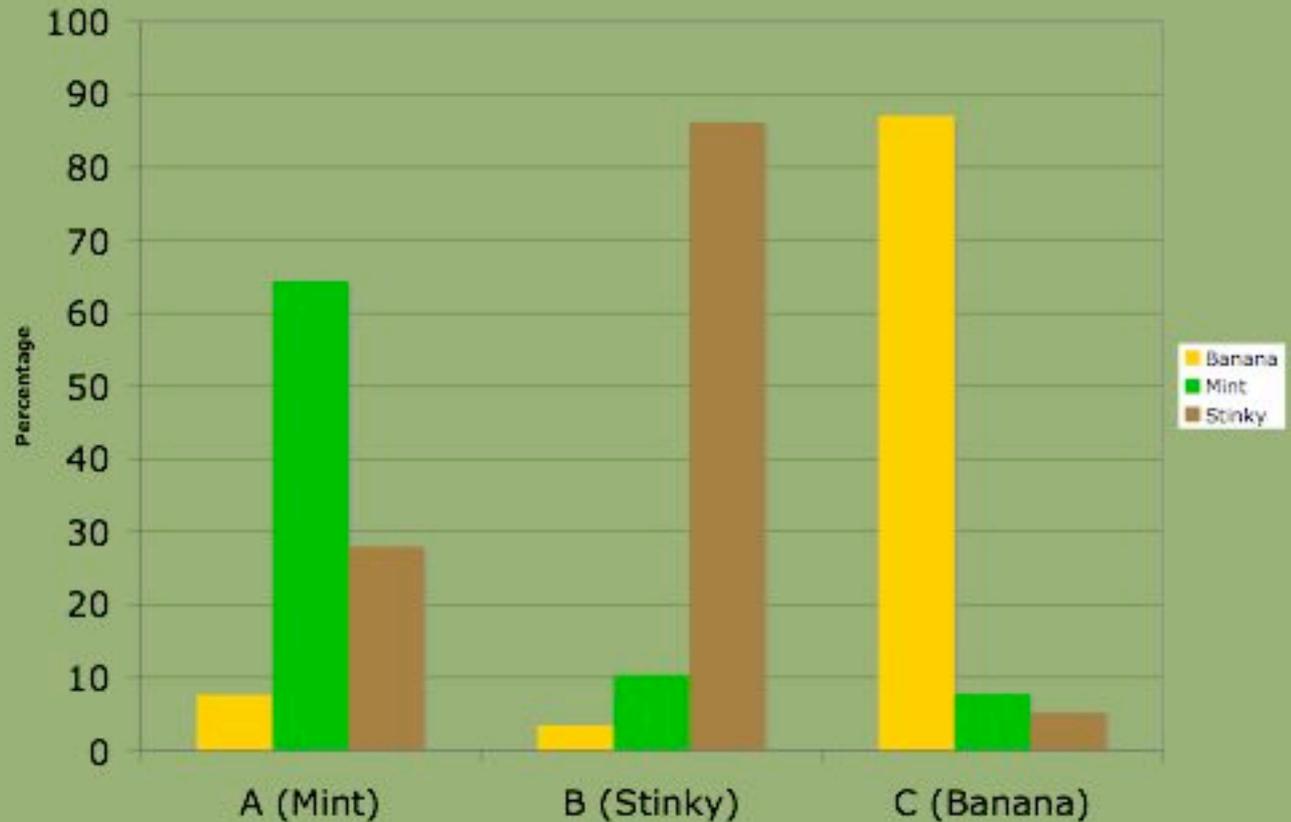

Results

- WGD
- Growth Dependent Regulation
- Growth Dependent Regulation + Inverter
- Indole-Free Bacteria
- Smell Test

What I Liked and Disliked

Results

Smell Test

What I Liked

Likes

- Able to change a simple experiment into a more complicated experiment
- They looked at what MORE there was to do; took their experiment to the 'next level' EX: Simple System to Complete System
- Got the audience involved, EX: Smell test
- Easy to comprehend
- Perfect example of a successful iGEM project
