Highlights of new launches, company achievements, research findings, and breakthroughs in the medical field
Experience the Power of Medical Journal Advertising

Release your ad’s full power by capturing the attention of the unique readership of the *Journal of Special Operations Medicine* (JSOM).

**The Power of Medical Journal Advertising**
Professional, peer-reviewed medical journals like the *JSOM* are a main source of medical information for physicians. Your products will be viewed and recalled directly by your target audience. Medical journal advertising delivers a high return on investment for all types of brands.

**Global Distribution**
*JSOM* readers live all over the globe, making it one of the most widely distributed professional medical journals. Many of our readers rely on the *JSOM* to keep them up-to-date!

Our readership includes medical professionals in the Special Operations Forces (SOF) and conventional military, civilian physicians, advanced tactical paramedics, dentists, and veterinarians, as well as members of Department of Justice agencies and SWAT with Tactical Emergency Medical Support (TEMS). It is distributed to university and military medical and paramedic school libraries, putting your ad in front of the current and future decision makers and users of your product.

The *JSOM* is the most practical and popular journal in tactical, operational, and clinical medicine. It provides information that saves lives and transcends the boundary between military and civilian Special Operations medicine, presenting the best-practice evidence from care delivered under active threat. It is the primary publication in which SOF and TEMS can identify, propose, and debate issues, making it invaluable to their professional development.

**Advertising Benefits**
The *JSOM* offers both print and digital packages. The advertising space is limited, increasing your visibility to readers. Internationally indexed, we have a committed readership; issues are “never thrown away” but are read, shared with peers, and reviewed many times over.

Chinook

Chinook serves the needs of Special Operations medics looking to carry just the essentials with the smallest cube and weight possible. We listen closely to end users and create products that specifically address our customers' needs. Our latest efforts have resulted in five new NSN procedural kits, including field blood transfusion, chest tube insertion, and cricothyrotomy kits. Our ability to source a variety of items included in the TAC Sets, AMALS, and CASEVAC, in addition to specialty items, ensures medics receive exactly what they request. Chinook provides professional kitting that saves our customers valuable time, eliminates wasted product, and ensures uniformity for training and missions. Purchasing from Chinook is made easier through a variety of procurement vehicles, including Prime Vendor, GSA, and ECAT. It is of the utmost importance to us that we supply Operators with the latest and most innovative medical gear available.

Just released... 2014 Product Catalog
ZOLL Medical Corporation
269 Mill Road, Chelmsford, Massachusetts 01824-4105
(978) 421-9732 / www.zoll.com

ZOLL has been a trusted partner and leading supplier to the U.S. military of resuscitation and monitoring technology for more than 25 years. Our products include the Propaq® M, the standard in vital signs monitoring, and the Propaq MD, with optional defibrillation and pacing. The Propaq meets all of your monitoring needs with advanced features such as 12-lead analysis and life-threatening arrhythmia (LTA) alarms. In addition, it provides significantly enhanced data communication, allowing you to capture patient care data from the point of injury through definitive care. Thanks to its open data architecture, the Propaq can support the military’s emerging telemedicine solutions, EHR systems, and custom reporting needs. Propaq is the platform designed to meet the military’s current as well as future mission needs.
RESEARCH

TEM5 Solutions: August 2014
Conclusion: The SWAT-T™ is a durable medical device with zero first-time-use failures, when properly used.

2013: Tourniquets and occlusion: the pressure of design.
Military Medicine: May 2013
Conclusion: The SWAT-T™ performed better than the CAT (Combat Application Tourniquet). The SWAT-T™ had safer pressures, and was more effective.

2012: Lighting did not affect self-application of a stretch and wrap style tourniquet.
Journal of Special Operations Medicine: Fall 2012
Conclusion: The SWAT-T™ stretch and wrap style tourniquet can be self-applied properly even in darkness. When properly applied, it stops limb arterial flow.

2012: Stretch and wrap style tourniquet effectiveness with minimal training.
Military Medicine: November 2012
Conclusion: The SWAT-T™ can easily be properly applied and can stop arterial flow at a variety of extremity locations. Proper application is associated with cessation of arterial flow.

2010: An Evaluation of the SWAT-T
Presented at the 2010 Annual meeting of the Special Operations Medical Association
- Douglas M. Kleiner, PhD
Conclusion: The SWAT-T™ rated very well in the variables evaluated and was rated comparable to, or better than the C-A-T for size, versatility, intuitiveness, durability, cost, and comfort.

Innovation and Versatility in TRAUMA CARE

In a class by itself, the SWAT-T™ is a multi-function trauma care device. Multiple Documented Saves!

Designed by a former SOF Operator/Medic, the SWAT-T will treat a variety of injuries, minor to life-threatening. The SWAT-T™ is being carried by Military (Conventional and Special Operations-medical and non-medical personnel), EMS, Law Enforcement Officers, Contractors, and Federal Agents. Carried by many as a pressure dressing, all-purpose wrap, primary and/or back-up tourniquet.

“The ultimate trauma multi-tool.” -HA US Navy, SEAL
“The SWAT-T packs light and is superior for kids.” - RS, Special Forces 18D
“The KISS principle on steroids!” - PT, Operations Manager, Triple Canopy
“3 SWAT-Ts used after Boston blast worked amazingly well.” - NM
“Worked great after windlass failure (high axillary wound).” - CY - US Border Patrol
“The SWAT-T saved my K9 partner! As a tactical team member, I will never deploy without a SWAT-T.” - NL
“It was soaked in blood and it held up great, still plenty of friction. Successful application, bleeding terminated.” - SV

Foster your professional development with a subscription to the JSOM

The Journal of Special Operations Medicine (JSOM) is the only peer-reviewed medical journal that specifically addresses the work environment of medical professionals who operate in hostile, remote and austere locations or a combination of all three. The JSOM allows a forum for universal contribution and discussion of Operational Medicine by military medics and practitioners and their civilian counterparts.

The content of the JSOM transcends military and civilian medicine by presenting practical ideas and techniques. It is the only journal focused on cutting-edge research and science, proven hands-on techniques, and lessons-learned in the world of Operational Medicine.

Operational Medicine is simply the art and science by which assigned or affiliated medical personnel provide medical support under operational constraints. All facets of Operational Medicine combine to accomplish two purposes: To accomplish the mission and to minimize the impact of that mission on those who perform it. If you or someone you know fits this description or are simply interested in knowing more about this unique brand of medicine, then you are invited to subscribe to the Journal of Special Operations Medicine.

THE ONLY JUNCTIONAL TOURNIQUET
TO SAVE LIFE IN UPPER AND LOWER JUNCTIONAL BLEEDING

The Abdominal Aortic & Junctional Tourniquet

The Abdominal Aortic & Junctional Tourniquet™ (AAJT) is the only junctional tourniquet approved to treat hemorrhage in the pelvis, a common complication of lower junctional injuries. Designed by Special Operations personnel who have confronted the problem of junctional hemorrhage and prolonged resuscitation.

Hemorrhage Stops Here™

www.compressionworks.net
www.speeroptech.com

The AAJT is: The Resuscitation Tourniquet™

The Abdominal Aortic & Junctional Tourniquet™ (AAJT) is the only junctional tourniquet that can provide benefit to your casualty regardless of the injury. When applied in the original abdominal placement location, the AAJT is capable of increasing your ability to sustain resuscitation efforts during long transport times and limited supplies.

With new research showing the benefits of stopping the flow in the aorta at the umbilicus, the AAJT has utility in many casualties. From cardiac arrest to post partum hemorrhage to multi-organ blast effects the application of the AAJT can aid in resuscitation efforts. Additionally, it is the only junctional tourniquet approved to stop bleeding in the pelvis. While the AAJT is able to stabilize the pelvis, it alone has the indication to control pelvic hemorrhage.

Increase your capabilities. One device, multiple uses. The AAJT is your Resuscitation Tourniquet™

- Pelvic Bleeding
- Inguinal Bleeding
- Axillary Bleeding
- Turn off the bleeding
- Stabilize the pelvis
- Prolong resuscitation
- External REBOA Zone III effects
- Increase in MAP for TBI patients
- Greater capability for limited supplies
- Safest Junctional Tourniquet (JntTQ)
- Only JntTQ with Human Safety Data
- The Best JntTQ for confined space rescue
- Quicker response to IV fluid, blood and plasma administration
- Definitive hemorrhage control during casualty movement

Heat Casualties Impact Your Mission

Maximize Performance. Measure WBGT.

- Rugged (MIL-STD-810G)
- Rapidly deployable
- Small and lightweight (weighs 4.5 oz)
- Measure up to 17 environmental conditions

advertising@JSOMonline.org

Breakaway Media is a professional publishing company providing high-quality specialty content across the world. We are dedicated to advancing the body of knowledge for medical and paramedical professionals operating in military, tactical, wilderness, disaster, or other austere environments. We are continuing to evolve and significantly enhance the academic awareness of our signature journal, the JSOM, in order to meet the increasingly complex clinical reference needs in the unconventional medicine community.
Experience the Value of Advertising in the 2015 Medical Technology Updates Supplement

With readers all over the globe, the 2015 Medical Technology Updates Supplement provides increased exposure of your product to an international community of unconventional medical experts.

The Medical Technology Updates Supplement Provides Added Value
In the tradition of the Journal of Special Operations Medicine (JSOM), the 2015 Medical Technology Updates Supplement (MTUS) will serve readers who have grown to rely on JSOM for cutting-edge medical and industry news. The MTUS will highlight new launches, company achievements, research findings, breakthroughs in the medical field, grants, and awards. By advertising in our 2015 MTUS, your company will receive an additional opportunity for exposure. JSOM’s quarterly advertisers will be included and spotlighted for no additional cost. Nonquarterly advertisers can take advantage of the MTUS’s reach for the cost of an advertisement.

More Exposure for Your Company’s Achievements
The MTUS will go to all JSOM subscribers, from the seasoned medical professionals to the up-and-coming decision-makers. In addition to your “Target Audience” of SOMA members, our subscribers range from SOF and TEMS, to conventional military, civilian physicians, medics, dentists, and veterinarians. We are now widely subscribed to by major university and military medical libraries, placing your company among resources and information that these medical professionals refer to time-and-time again. Advertising with the JSOM puts your ad in front of current and future decision-makers and users of your product. Advertising in the MTUS gives you the opportunity to tell the readers about your important company news.

The Benefits of the Medical Technology Updates Supplement!
FREE for JSOM Quarterly Advertisers
▷ Priority placement for JSOM quarterly advertisers
▷ Digitally hosted so all future subscribers will have access to it for years to come
▷ Plus, your ad will also be featured in one or more of our bimonthly eNewsletters!
▷ That’s 6 or more ads for the cost of 4!

Exposure to Target Audience
▷ The MTUS will go to JSOM’s readers, which includes all SOMA members.
▷ The MTUS will be available to the students and faculty of military and major university medical, PA, and paramedic school departments and libraries.

Exclusive Access – Only a select number of companies will be featured in our Medical Technology Updates Supplement, giving your brand the exposure and exclusivity it deserves.

Advertising Discounts for SOMA Exhibitors – As an exhibitor at the Special Operations Medical Association’s Scientific Assembly, you will receive 10 percent off the price of advertising in the JSOM.
