

How do I search for a course?

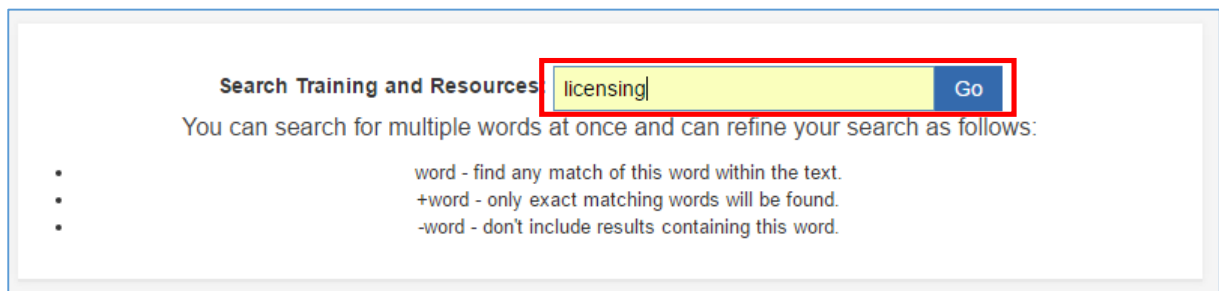

All MyODP.org courses are arranged by categories and may sometimes be difficult to find if you aren't sure of which program area they might fall under. Moodle has a search function which makes finding a course much easier.

There are two ways to access the Moodle Search functionality:

1. Use the Search button which is located on the MyODP.org Navigation bar. Clicking that link will open the Training and Resources Search page...

- a. The search functionality works by keywords. Enter a keyword

- b. Courses which relate to that keyword will be displayed.
