

# THE P4P PROSPERITY PATHWAY™

The Prosperity Pathway™ is an integrated, five-step Prosperity Economics™ program designed to help you to expand your personal economy. The focus of the Pathway is to help you increase your confidence, enhance your cash flow, ensure your economic protection, and help you fully implement strategies that lead to accelerated prosperity.

Based on P4P's 7 Principles of Prosperity™, this program combines education with strategies and step-by-step implementation guidance to help you realize your maximum prosperity potential. Following the steps of the Prosperity Pathway™ we strive to help you make each of your dollars do many jobs as opposed to doing only one job. .

## **Throughout the five steps of the journey, you'll explore how to:**

- Learn and integrate the principles of prosperous thinking, being and doing.
- Establish the baseline of your current personal economy.
- See your economy from a macro-economic point of view.
- Measure and recover "lost opportunity cost."
- Execute strategies for controlling your assets.
- Implement velocity of money multiplier methods.

### **Step 1 – Explore:**

Explore the 7 Principles of Prosperity™ and learn how applying these principles can accelerate your abundance with certainty by giving you an "opportunity filter"; this filter helps you to measure financial steps you are considering taking, in order to determine if they are a good match.

### **Step 2 – Envision:**

Benefit from our Prosperity Profile™ tool, which gives you a macro-economic view of your current personal economy. This baseline serves as your prosperity global positioning system. With this as the starting point, the goal is to equip you to apply the 7 Principles to every dollar you have laid out on the Profile™, so you can increase its efficiency.

### **Step 3 – Embark:**

Building on discoveries from Steps One and Two, take ACTION to improve your economy by implementing strategies that are designed to enhance how your money works for you. To further improve your financial confidence, we'll help you to understand if a recommended strategy makes sense, numerically and objectively, using our Truth Concepts™ software.

### **Step 4 – Execute:**

Use the Prosperity Principles™ to choose financial products that complement ones you may already have, so that you get a chance to see how each of your dollars can work many jobs at the same time.

### **Step 5 – Expand:**

As you gain experience in applying the Prosperity Principles™ to your personal economy, your financial confidence should increase, your view of possible investments expands, and your ability to recognize opportunities to improve your economy sharpens.
