## PERFORMANCE

### GT-R License Plate Relocation Kit

2016-03-23

Thank you for purchasing this PERRIN product for your car! Installation of this product should only be performed by persons experienced with installation of aftermarket performance parts and proper operation of high performance vehicles. If vehicle needs to be raised off the ground for installation, the installer must use proper jacks, jack-stands and/or a professional vehicle hoist for safety of the installer and to protect property. If the vehicle is lifted improperly, serious injury or death may occur! Please read through all instructions before performing any portion of installation. If you have any questions, please contact our tech department prior to starting installation. We can be reached in any of the following methods:

#### GENERAL MODIFICATION NOTE

Modifications to any vehicle can change the handling and performance. As with any vehicle extreme care must be used to prevent loss of control or roll-over during sharp turns or abrupt maneuvers. Always wear seat belts, and drive safely, recognizing that reduced speeds and specialized driving techniques may be required. Failure to drive a vehicle safely may result in serious injury or death. Do not drive a vehicle unless you are familiar with its unique handling characteristics and are confident of your ability to maintain control under all driving conditions. Some modifications (and combinations of modifications) are not recommended and may not be permitted in your state or country. Consult the owner's manual, service manual, instructions accompanying these products, and local laws before purchasing and installing these modifications. You are responsible for the legality and safety of the vehicle you modify using these components.

#### Parts Included with the PERRIN Front License Plate Relocation Kit:

- (1) PERRIN Offset Plate Holder
- (1) PERRIN GT-R Tow Hook Stem
- (1) PERRIN GT-R Spacer
- (1) 7/16-20 SS Hex Bolt, Black Oxide
- (4) M6x10mm Button Head SS Screws
- (4) M6 SS washers
- (7) 7/16" SS Flat washers, Black Oxide
- (1) M4 Hex Key
- (2) PERRIN Plate Frames
- (1) Anti-seize Packet

### **Installation of PERRIN License Plate Relocation Kit:**

- 1) Locate and remove front tow hook cover on front bumper. Use a small flat head screwdriver with a towel behind it and carefully pry plastic plug from bumper.
- 2) Install Tow Hook Stem into threaded hole using 1" socket and tighten to roughly 50ft-lbs. If hole looks rusty or corroded (or you live in an area where roads are salted in winter), apply a small amount of included anti-seize to threads, and spray some penetrating oil into the hole before installing. **NOTE: 2011+ cars will need to use included spacer. Place spacer onto threaded end of PERRIN Stem, then install into chassis and tighten.**
- 3) Install PERRIN plate holder to stem, use at least (1) flat washer between stem and holder and (1) washer between holder and bolt. Align plate holder to desired position and tighten bolt to roughly 30ft-lbs. **If aftermarket bumper is installed, use included washers and or spacer to adjust plate holder to desired position.**
- 4) Install license plate and PERRIN Plate Frame to holder, using supplied M6 bolts and washers. Hand tighten bolts only!
- 5) Ensure license plate does not interfere with car in anyway, or damage WILL occur. If plate needs to be moved away from car add washers between Tow Hook Stem and Plate Holder. **NOTE: License plate holder can be slightly bent left to right to account for minor variations in cars. Take care and to not bend more than 3/8" one direction or the other or damage will occur.**
- 6) After a 2-3 days of driving, recheck tightness of all hardware to ensure plate and holder have not come loose. **NOTE: We recommend checking the tightness of hardware once a month to ensure plate never falls off.**
