

ALL DOGS CAN SWIM... RIGHT?

In fact that's not true. Even if your dog loves the water, he or she may not actually be safe without supervision. Here's why:

- If the water is too cold, muscle cramps can leave them at risk for drowning.
- Water currents can often be very powerful and your pet may not be strong enough to swim to safety.
- A dog that jumps from, or falls from, a boat at high speed can be injured upon impact.

At Pet Planet, we have a variety of options such as Life Jackets to keep them safe.
