St. M. B. March 28th 1859.

My dear Child,

I will now answer your question:

1. As to the Mt. Sanità, you were right. The French are not going from Rome.

For my part, I think the normal condition of the Romans that they be left to run their city, and always for that.

If he loved it by his own will and
not the Times came?

2. P. Papageorge was my master. He left the Delphic from a deep divinity in life mode of teachings and from the various chrestoss from it. The majority being against him.

3. The Arni de la Religion is very good, in touch of little Galliano a National. The Delphic is Roman not exaggerated and not accurate when it enters England.

The times is worth looking.

April 4: Your letter is just coming. Look at the date of this.

Yes, I think I do remember the C. Coltham on 1 Peter. What an age ago.

Many memories now placed me in the situation again.

I have just received a Chaplin.

Mr. Brough a friend of this. It's a friend of the Brough. He was a retired. He is at London before I left it. I remember all about it.

Then the Church service was

a Mass in 1 and say a
May a 1-bit ring of the f. pray.

As for people - they are becoming

more conscious and they have done their

work without success. Really it gives

one comfort. For no work would have

been so apparent if it came out of

God.

You will come to no harm in

your known world. Don’t mean

knowing but that of God’s care.

The lamp will not go out. With love

always yours in W.
