

# PORZIO AggregateSpendID®

A Market Leading Solution from MedPro Systems and Porzio Life Sciences

*Simplify Aggregate Spend Compliance with an  
Internet-Based Tracking and Reporting Solution*

Several states and the federal government require life sciences companies to track and report interactions with healthcare providers and organizations. Reportable interactions may include the provision of meals, honoraria payments, samples, educational items, grants and sponsorships.

Compliance professionals must prepare for and comply with complex tracking and reporting requirements, including laws that restrict interactions, limit spending, and establish specific reporting parameters and formats. To meet the terms of these diverse requirements, life sciences companies must create and follow processes that facilitate the capture and communication of accurate information.

Porzio Life Sciences and MedPro Systems have partnered to introduce an end-to-end aggregate spend solution for the life sciences industry. **Porzio AggregateSpendID®** fuses data matching and aggregation technology with regulatory and compliance expertise. This combination enables life sciences companies to track and integrate expenditures from multiple sources, whether incurred by home office, field personnel or third-party vendors, and to efficiently prepare compliance and internal management reports.

**Porzio AggregateSpendID®** integrates governmentally imposed requirements with a company's unique business model to automate the process of capturing, evaluating and reporting healthcare provider interactions. Valuable features of the system include:

- Sophisticated and open aggregation architecture for automatic capture, manual entry and review of spend transactions
- MedPro Systems' 18 million record HCP database and CMS Federal Teaching Hospital and NPI list
- The ability to track detailed interactions with individual healthcare providers
- Automatic currency conversion of spend incurred outside of the United States
- Access to the Porzio Compliance Digest's Transparency & Limitations Database, which contains up-to-date information on state and federal laws and regulations impacting life sciences marketing activities
- Creation of governmentally mandated state and federal reports with export capabilities
- Ad hoc reports with highly configurable parameters and sort options for internal auditing and monitoring of sales force trends and activities
- Configurable alerts that notify users and administrators of spend that approaches government- and company-imposed thresholds

#### **About Porzio**

---

*For more than 30 years, the law firm of Porzio, Bromberg & Newman P.C. has provided regulatory counseling, risk management and litigation avoidance counseling to pharmaceutical, biotechnology and medical device manufacturers. Our experience and dedication to the life sciences industry led us to create Porzio Life Sciences.*

#### **About MedPro**

---

*MedPro Systems® was founded in 2001 to provide the best healthcare license solutions available, based upon the powerful integration of licensing data and information technology. The result is the industry-leading MedProID® suite of products and services.*

*The MedProID® database contains over 18 million healthcare licenses from more than 500 state and federal sources. Currently over 375 customers in the healthcare industry utilize the MedProID® suite to meet their compliance objectives.*

*To assist pharmaceutical and medical device manufacturers with state and federal spend reporting requirements, MedPro Systems is experienced in identifying and aggregating HCPs and entities across multiple data silos.*
