

SLIVER.tv Launches Global Partnership with ESL One, Intel Extreme Masters and DreamHack to Live Stream in Virtual Reality 14 Premiere esports Tournaments in 2017

Cupertino, CA – January 17, 2017 -- SLIVER.tv, the leading esports 360° virtual reality entertainment platform, is announcing its broad-reaching 2017 partnership with ESL and DreamHack, two of the top esports tournament organizers in the world. ESL's mega events like ESL One and the Intel Extreme Masters series, DreamHack's DreamLeague, DreamHack ASTRO Open and DreamHack Masters reach over 50 million global esports fans of competitive games including *Counter-Strike: Global Offensive (CS:GO)*, *League of Legends (LoL)* and *Dota 2*, and bring together the best of the best esports teams and players in the world.

Mitch Liu, founder and CEO of SLIVER.tv, said: "We are thrilled to be working closely with two of the largest esports tournament organizers in the world in 2017. Our vision is to forever transform the esports spectating experience by providing new perspectives and insights into live esports streams. In partnering with ESL and DreamHack across these 14 global events, we have the opportunity to showcase our 360 virtual reality, live replays and stats technology to millions of esports fans worldwide."

SLIVER.tv has been Beta testing its VR Live Cast tournament platform for the past three months in collaboration with ESL, at events such as ESL One New York and Intel Extreme Masters in Oakland. Powered by the company's Virtual Camera array patented technology, the new stream enables spectators to step into and experience top esports games in fully immersive 360° virtual reality. The most recent event, IEM Oakland drew over 130,000 unique viewers across SLIVER.tv's web 360, mobile and VR apps platform and drove 40% greater engagement and 13x more video content consumed over the first event.

Stuart Ewen, Product Manager of ESL, said: "Our partnership with SLIVER.tv at ESL One New York and IEM Oakland last year exceeded our expectations, and our fans, teams and players were blown away by the first-ever live broadcast of CS:GO and League of Legends in VR. We are delighted to partner with SLIVER.tv this year across 7 events starting with Intel Extreme Masters in Katowice, Poland where in 2016 we saw over 100,000 attendees and nearly two million peak concurrent online viewers. With the help of SLIVER.tv we hope 2017 will be even bigger and better."

Marcus Lindmark CEO, DreamHack AB, said: "DreamHack was impressed with SLIVER.tv's success with ESL events last year and its unique offering. We decided to work exclusively with SLIVER.tv globally in 2017 on 7 events and leverage its turnkey end-to-end VR Live Cast platform solution so we can focus on our production. DreamHack ASTRO Open is one of the longest running esports circuits in the world with over 150 million started streams alone in 2016. We are looking forward to an even more successful year with the addition of the new 360 VR streams."
