### HOME OWNER

18 HILLCREST WEST  
PORTLAND, ME 04103

DETECTOR #	TEST AREA	RADON IN AIR (pCi / L)
1- PN04030	BASEMENT :	1.0
2- PN04030	BASEMENT :	1.0

Test Start Date: 2/23/2014      Test Start Time: 3:30:00 PM

Test End Date: 2/25/2014      Test End Time: 3:30:00 PM

Temperature (F): 68

It should be noted that if the temperature was not provided on the information sheet a temperature of 70F will be assumed.

*The results of your air radon screening test are listed above.*

*Your average radon measurement has been found to be below the EPA action level of 4pCi/L. The EPA recommends follow up measurements and fixing a home at levels of 4pCi/L or higher. The State of Maine considers levels of 2pCi/L desirable but does not necessarily recommend action unless over 4 pCi/L*

Should you have any questions concerning your radon test result(s), please feel free to call us.

Thank you for using Northeast Laboratory testing services. Contact NEL for your other environmental analytical needs, including water testing for lead and arsenic or indoor air quality.

**Authorized by: Harold Flachsbart, Chemistry Laboratory Director      Date: 2/27/2014**

Note: The State of Maine Radon Registration Act (22 MRSA sec. 771 et seq.) requires this laboratory to report the test results and zip codes of structures tested, and the street address in cases of very high radon levels. Information on indoor radon, and any questions, comments, or complaints concerning radon services should be directed to the State of Maine Radiation Control Program, State House #10, Augusta, ME 04333-0010, 287-5676 or 1-800-232-0842. ME REG# ME00300C. NRSB accreditation #ARL0012
