Radon measurements with a reading of 4pCi/L or more are at the EPA action level. The EPA recommends follow up measurements and fixing a home of 4pCi/L or higher. The State of Maine considers levels of 2pCi/L or lower desirable, but does not necessarily recommend action unless over 4pCi/L.

It should be noted that if the temperature was not provided on the information sheet, a temperature of 70F will be assumed.

Information on indoor radon, and any questions, comments, or complaints concerning radon services should be directed to the State of Maine Radiation Control Program, State House #10, Augusta, ME 04333-0010, 287-5676 or 1-800-232-0842.

Should you have any questions concerning your radon test result, please feel free to call us.

Please, contact NEL for your other environmental analytical needs, including water testing for lead and arsenic or indoor air quality.
