Radon measurements with a reading of 4pCi/L or more are at the EPA action level. The EPA recommends follow up measurements and fixing a home with levels of 4pCi/L or higher. The State of Maine considers levels of 2pCi/L or lower desirable, but does not necessarily recommend action unless over 4pCi/L.

Information on indoor radon, and any questions, comments, or complaints concerning radon services should be directed to the State of Maine Radiation Control Program, State House #10, Augusta, ME 04333-0010, 287-5676 or 1-800-232-0842.

Should you have any questions concerning your radon test result, please feel free to call us.

**Please, contact NEL for your other environmental analytical needs, including water testing for lead and arsenic or indoor air quality.**
