*Would you burn a widow's home?*

*What about her retirement savings?*

“Of course not!” you say, “I would never do that!”

But do you know of the village that burned not only a widow's retirement savings, but also the savings of an older single woman, the farm down payment of a young married father, and a school's building fund? In all, the village burned about \$3 million.

---

*Three million dollars  
is a lot of money,  
but how much?*

## *How much is \$3 Million?*

A one-foot stack of new one dollar bills is worth about \$2,700.<sup>1</sup>

A stack as high as a 95-foot silo totals a quarter of a million dollars, so twelve stacks as high as a 95-foot silo gets you to three million dollars.

## *How much is \$3 Million?*

What could \$3 million buy  
in America?

Food for almost four hundred  
American households for one year.<sup>2</sup>

*Groceries for  
400 households*
