

## Setup Instructions

### iOS and Android

You can download the CropRecords apps from the iOS and Android App Stores here.

[http://www.croprecords.com/get\\_started.html](http://www.croprecords.com/get_started.html)

When the program runs you will be asked to enter your username and password

### Windows

To download the Windows desktop program go to [www.croprecords.com](http://www.croprecords.com). Click on the login link (top left), and there is a download link on the login screen. If you have a 64-bit machine make sure to download the 64-bit installer.

Installing the Windows Program

1. Install the CropRecords Windows program
2. At the main screen double click on add/edit users
3. New
4. Enter your username and password
5. Continue
6. Next
7. Wait for the program to synchronize with the server.
9. When it says synchronization complete press the back button.

The CropRecords mobile apps and Windows program are designed so they can be used when offline in the field and synchronize when internet is available. In order to share data between users and devices it is important to sync before and after working in the application.
