

60220 - E | Wireless Repeater

The 60220 -E Wireless Repeater effectively doubles the range of Actall 900 MHz transmitters. The Wireless Repeater receives, decodes, and retransmits signals from all transmitters that are within its range. The Wireless Repeater installs in minutes, providing a powerful tool for the design and installation of large projects. The repeater will act intelligently, retransmitting alarm signals from Actall 900 MHz transmitters while ignoring background noise.

Features & Benefits

-  Compatible with the PALS® 9000 systems
-  Large sites can be covered with multiple repeaters (site tests required for accurate coverage)
-  Indoor / Outdoor Coverage available
-  Reliable 900 MHz operation
-  900 MHz spread spectrum radio link
-  Range of fixed point and mobile transmitters is increased
-  Allows virtually unlimited number of repeaters to be added to any job
-  Signal Synchronization Technology processing minimizes excessive signal generation
-  Flexible design monitors back-up battery, protects case against tamper, and allows repeater to be
-  Programmed as a point for supervising radio link from repeater to home receiver
-  Includes back up battery and step down transformer
