

60320 Commercial Monitoring System

The 60320 Commercial Monitoring System is a grouping of head end components that provides an entry level monitoring center for the PALS® 9000 Duress System. It includes a CPU with typical peripheral components and Crisis Controller® software licensed for 2 CPU's and 100 transmitters. These parameters are easily upgradeable for future expansion.

Features & Benefits

-  User friendly Windows® XP compatible
-  Capable of handling over 65,000 transmitters
-  Graphical User Interface (GUI) for site and building mapping
-  Fully supervises all hardware related equipment for fault indication
-  Software allows for alarm location, and automatic alarm notification paging
-  Multiple CPU point capability via dedicated hard-wired LAN network

Specifications

-  For more information about standard head end components please see data sheets for the following items:

70100	PALS® Monitoring Center CPU
70201	Alert Communicator Board
70320	Crisis Controller® CPU watchdog
60201	E-Series Serial Receiver Assembly
70421	19" Touch screen LCD Monitor
70430	Logitech® S-120 Speakers
60613	PMT Programming Cable (USB)
30020	Crisis Controller® Software (Advanced Version)
