

JUNE 17, 1981

Dear Mr. Kyung Won,

Please excuse me for not keeping in better communication for some time now.

Last monday I had opportunity to speak with Jay Ho for short time, before the court appearance. It seems everything is going well as it can be with all the committees, it seems we are growing stronger, with more people joining the committees and more people learning about the case, as people like yourself, in California and New York has been greatly helpful in keeping committees stronger, and just waiting for trial to start. But as you may have been inform, the trial on the Chinatown case has been post-poned once again to August, so very hopefully there will not be any more delay in August, as I and everyone else thought for sure the trial was to start this month. It looks there will be decision on prison case before the trial, so maybe there be some best news story for us during this summer, after waiting all this time.

During short conversation with Mr. Ho, he informs me you have been ill, so I hope you are able to get some much needed rest to restore you back into good health, and very hopefully your not suffering from any serious illness at this time, as like many others I'm very concern for your well-being, I've been aware of how hard you have been working, since starting Koreatown, so please try to keep in best of health.

Very Respectfully,
정수
