Audio-Digest Foundation
a non profit subsidiary of the California Medical Association
"The Spoken Medical Journal"

How Audio-Digest Foundation
Extends the Value of
Lectures and Panels Delivered
at Medical Meetings

What is Audio-Digest?

In the event that you are not familiar with the Audio-Digest Foundation — its organizational structure and the purposes of its existence — may we briefly describe for you the objectives of the attached invitation?

Thirty-five years ago, the Audio-Digest Foundation was established as a non-profit subsidiary of the California Medical Association. Since Audio-Digest is owned by, and designed for, the medical profession, it has never operated under a profit motive. Each year, the Foundation's Trustees earmark those financial reserves that have accrued over and above administrative, sales and editorial expenses and donate them to other worthwhile endeavors aimed at broadening the horizons of medical education.

Hundreds of thousands of dollars are being contributed by Audio-Digest to the American Medical Association Education and Research Foundation for disbursement to the nation's medical schools. Audio-Digest is also underwriting scholarships to needy and minority high school students seeking education and careers in medical and paramedical fields.

When your lecture (or panel discussion) is recorded by Audio-Digest (through the kind cooperation of the organization sponsoring the meeting at which you will speak), it becomes a candidate for inclusion in one of twelve separate subscription services. Twice a month, the Foundation prepares tape recordings, of one hour's duration, that go to these separate specialty markets: Anesthesiology, Emergency Medicine, Family Practice, Internal Medicine, Obstetrics-Gynecology, Ophthalmology, Otolaryngology—Head and Neck Surgery, Pediatrics, Psychiatry, and Surgery. Monthly editions are also produced for Orthopaedics and Urology.

Each of these programs attempts to single out presentations of real merit, which make a legitimate contribution to the advancement of scientific knowledge.

Your consent means that your voice and experience may go far beyond the relatively small audience of the convention itself — going instead to all corners of America and, in fact, to the entire world. Navy medical officers will hear it aboard their ships in the South Pacific. Medical missionaries will hear it in Africa. And physicians in practice from Bangor, Maine, to Carmel, California, will hear it in their dens, during an office break, or in their automobiles.

With this altruistic purpose in mind, we invite you to sign and return the enclosed postcard, knowing that — as you do — you will be making, directly or indirectly, a tremendous contribution to the advancement of medical knowledge everywhere.

Sincerely,

The Editors

Dear Doctor Wofsy:

The Audio-Digest Foundation, a nonprofit subsidiary of the California Medical Association, has been authorized by Dr. Robert B. Baron to tape record the "Primary Care Medicine: Principles and Practice" symposium, to be presented September 13-15, 1989, by the University of California, San Francisco.

The discussions recorded at this meeting may later be selected for dissemination to the Foundation's continuing education audiences through our series of tape recorded programs of postgraduate medical education.

Would you, Doctor Wofsy, permit us to consider your remarks for inclusion in this selection of material? Your signature on the enclosed postcard is all that is necessary. Your consent does not deprive you of any future use of your material -- it is purely a clearance for our purposes. And, should your material be heard on an Audio-Digest program -- with your permission, of course -- a copy of that particular issue will be sent to you with our compliments.

We know our physician-listeners will be as grateful as we for your approval.

Cordially,

Claron L. Oakley
Senior Vice President
and Executive Editor

FROM: Connie Wofsy, M.D. *Connie W.*

RE: Measles Miscellany

To confirm our conversation, without making a formal policy, why don't we plan on the following:

1. Measles immunization - I have already announced the following information to the patient care conference on Thursday, 8/17. Persons born before 1957 are presumed to be immune. Persons born between 1957 - 1967 are probably not immune, even if immunized because the vaccine was inadequate and those vaccinated after 1967 are immune if they received a reliable vaccination through their pediatrician or other provider. The employee health service will make measles vaccine available to those individuals who are not presumed to be immune and there is a moderate measles outbreak occurring nationwide and in the Bay Area.

2. Regarding exposures which might occur in the clinic and the waiting room:

If we identify a bona fide case of measles in somebody who has sustained waiting room or treatment room contact with other immunocompromised patients, we should offer immune serum globulin to those exposed individuals. This could be done by identifying those persons who were in the waiting room, e.g., at a fixed interval of time, calling those individuals, confirming whether or not they were in the waiting room, and then setting up some type of mass ISG administration plan in the treatment room over several consecutive days. Because the ISG must be given within six days, we would have to mobilize quickly.

3. No further action seems to be required at this time, but should Grace Lusby or others from the Infection Control Committee contact us, at least we have a common preparation for action for needed.
4. You had indicated you would convey the information to J.B. and I will forward a copy of this memo to him.

RE: Requests for Speaking

I know that sometimes callers will say, "Dr. Wofsy suggested that I call you.", which may imply pressure. If I give a name, it is indicating excellent knowledge of the subject of Women and AIDS and not that the individual can or will accept the invitation.

I exercise considerable judgment about when to give a name, whose name to give, etc. If I have a particularly strong feeling that someone from the AWARE project should be given the opportunity to speak or will want to speak, I will leave a personal note. Please realize that I would not make any implied commitment on the part of another person to participate in a conference.

RE: Grant H62/CCH903022

Dear Bill:

The Project AWARE group here has had an excellent and productive relationship with you and your staff over the last four years, and we look forward to continued collaboration on our mutual research concerns. As the present grant is beginning its third year, the time has come for me to formally request that Judith Cohen, Ph.D., be designated as the Principal Investigator on the study.

As you know, Dr. Cohen has provided the day-to-day leadership of the study since the beginning. With my recent promotion to Professor of Clinical Medicine, increased responsibilities in the APEX program, and involvement in the AIDS 1990 Conference planning, I must focus my leadership at the policy level for the AWARE and SIS programs. It is thus appropriate that I move to Co-Investigator status.

I know from your recent visit and discussions with us that you are anticipating this request. Please be assured that I will continue to take a policy interest in the research effort, and I am sure that the program will continue in its present productive directions under Dr. Cohen's leadership.

Sincerely,

Constance B. Wofsy, M.D.

San Fransico Cal.
USA

Dear Connie,

A short communication from your satellite in Malmoe, Sweden.
I enjoyed our brief encounter in Montreal (it might have lasted a bit longer, though). You as a person and a representative of SFGH means much to us here in our general hospital. Problems of diagnosis and therapy etc. are often settled with the help of your experiece as taught to us in the Apex course.

I am now writning to you about one of the two nurses in our HIV out-patient department, 25 year old Karin Persson who would like to have experience in Hiv/AIDS work in San Fransico. She worked for a year in the department of nephrology and renal dialysis before coming to us a year ago. She has been particularly active in the home care of Aids patients. She would like a three or six months employment, starting this winter, in any Hiv or AIDS department. Do you see any posibilidad for her in your hospital or elsrwhere?

She is young, easy-going and energetic and has lived in the United States extensively already.

We, of cours, would very much like to have a nurse with personal experince of AIDS work in San Fransico.

Greetings to you and to Sam as well as to Gifford Leoung, Dan Abrams and Andrew Moss.

Yours sincerely

Torkil Moestrup

Dear Dr. Wofsy:

Thank you for agreeing to be a consultant for a Patient Care article on protozoal infections in patients with AIDS. I look forward to our discussion later today.

Patient Care serves more than 100,000 primary care physicians. The articles are consensus pieces based on one 35-minute telephone interview with each of **three** experts in a given field. After I write the article, you and the other consultants will have an opportunity to review it for completeness and accuracy and to make any changes you think will make it more helpful to our readers. It may be necessary for me to call you briefly at that time to follow up on any questions that the prepublication readers may have. A \$100 honorarium will be sent to you at that time as well.

August 17, 1989
Constance Wofsy, MD
Page 2

This article will be included in a special issue on AIDS in primary care. The medical issue editors are Michael Gottlieb, MD, of Sherman Oaks, California and Richard Sadovsky, MD of Brooklyn. The other consultants for this article are Stanley Yancovitz, MD of Beth Israel Medical Center, New York City, and Ronald Grossman, MD, also of New York City.

Please be so kind as to sign and return the enclosed copyright form. We need your Social Security number in order to forward your honorarium.

Thank you again for your consideration. Please feel free to call me at [REDACTED] or [REDACTED] if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Mary Desmond Pinkowish".

TO: Merle Sande, M.D.
FROM: Connie Wofsy, M.D.
RE: IDSA Applicants
Drs. Judith D. Johnson and Steven R. Mostow

Both of these individuals are obviously highly qualified to take on leadership roles in AIDS Training themselves. The main benefit that training would provide for these individuals is an opportunity to see regional differences, to network, and to develop a little polish which I think would probably go in both directions. This is probably not what the ID Training Program had been designed for initially, i.e., to bring new players into the fold. Nonetheless, these are the ID physicians expressing interest and perhaps it serves more as a mini-mini-sabbatical for battle-wearied AIDS practitioners in one city to come and watch the battles going on in another city. This can be surprisingly refreshing.

In that capacity, they both look like superb candidates and certainly would be enjoyable to spend time with at whatever program they choose to come to.

MEMORANDUM:

TO: AIDS PROGRAM FACULTY
FROM: Barbara Woodruff
RE: Annual Report

As you have probably heard, Dr. Sande has arranged to have the Medical Service formally reviewed. The reviewers are: Drs. J. Claude Bennett (University of Alabama at Birmingham), Harold J. Fallon (Medical College of Virginia), and Arthur H. Rubenstein (University of Chicago School of Medicine). The Division has been asked to prepare an Annual Report to facilitate this process. Within the next day or so, more details will be available on the format required and these instructions will be disseminated to those of you who are in charge of specific activities within the Program. Everyone, however, will need to provide me with an updated curriculum vitae and bibliography.

Please forward your cv's as soon as possible but no later than 08 September 1989.

*CV Handdelivered 8/18/89
to Barbara*
