

A Backdrop for all narration of gay life - it'll be odd that it's not mentioned

a) Disaster strikes a "golden youth" - poignant memories of recent glory
70's as a golden age. "Never such innocence again"
Innocence savaged, or at minimum, transformed.

b) Present horrors

c) Distance of "front line" from "home front" - "They just don't understand"

d) When will it end?

e) Meaninglessness of catastrophe - no real villains, though
we try for them - no "causers"

f) Disillusion with authorities - Medical/Military-Political.

Soltes: "They gave the wrong medicine" "They sent the wrong SS forms again"

Role of rumor. Talismans, miracles, superstition

The stuff of "unexplicable terror long + inexplicably endured"

g) Advances of euphemism and sentimentality.

* Common Themes of obits -

Spirituality - The raw psychic wound of a young loved one taken away

Sanctification of the sufferers - identity w/ Christ, etc.

h) Ridiculous proximity

i) Play it safe. Transcending fear leads to election (Nags.)
Idealization of "youth unsaved."

(E) Vivify pleasure

Advance aged gays, celibates

Stronger community

The "war will continue to be fought in the psyche"

Partners good

Community strong

Backdrop

Design: V. Papaya Mann

WASHINGTON IS A CAPITAL CITY. LETS KEEP IT THAT WAY. BLACKS ARE HIGHLY SUSCEPTIBLE TO AIDS, HERE IN OUR CITY. THERE HAS TO BE A SOLUTION, WORK WITH US TO FIND IT.

Here in Washington, D.C. over 50% of those with AIDS are Black. In fact, there are women included among those cases reported within the last year. AIDS is not only a national problem, it is a problem right here in the nation's Capital, and it's a problem for everyone!

The number of persons with AIDS in Washington has risen steadily in the last year, and the Whitman Walker Clinic is very concerned.

Within the District of Columbia, AIDS has appeared overwhelmingly among Gay or Bisexual men (92%), with approximately 77% of those cases falling in the age bracket of 39 years or younger. Among the 50% Black persons with AIDS category, a larger portion of them are in a younger age grouping than whites: 41% are ages 20-29 and 45% are ages 30-39 as compared

to 3% and 61% respectively for the white males.

The AIDS problem is getting worse, not better, and that seems to be especially true for Black male homosexuals in the D.C. area. To date, over 40% of all reported cases have resulted in fatality. Now is the time to educate yourself, and your friends about this mysterious disease.

Washington is a Capital City. The administrative personnel, medical specialist, and support staff at the Whitman-Walker Clinic want to help assure that it remains that way. They are doing more than ever to eliminate the spread of AIDS, and to make sure that persons with AIDS get the best medical and psychological assistance available.

Go to the clinic, attend seminars being sponsored by the clinic on Safe Sex

practices, and encourage your friends to come, too. We owe it to ourselves, to educate ourselves, and protect ourselves from AIDS.

Work with the Whitman-Walker Clinic towards keeping Washington a Capital City. They provide education about preventive measures, AIDS testing and diagnostics, A Buddy Program for persons with AIDS, and many other AIDS related services.

When in doubt—go to the clinic and find out. Ignorance is not bliss, it can be fatal! For more information call the AIDS Information Line (202) 332-AIDS.

**We cannot prevent or cure that which we do not understand.
Let's pull together. Together we can live.**

Long view - How will It be remembered? What habits, forms, themes will carry on?
 Defining "demographic catastrophe"

The examples of

① SF Gay ♂	(N=70,000	St=40%	C=1800	+ = 1000)
② NY Gay ♂	(N=200,000	St=50%	C=2500 3800	+ = 1800 2000)
③ NY IV Users	(N=100,000	St=60%	C=1500 1700	+ = 900)

Optimistically, 6% of each group will be dead in 5 years.

The concentration in 25-45 age group (48% + 14% + 10% $\cong$ 72%)
 $\therefore$ The dent in the cohort curve

Impact on age mates (The "psychologically wounded")
 Loss of mates; close encounter & dying

Inspiration - looking at obituaries in B.A.R.
 Similar situation in WWI:

- a) Young men
- b) Cohort dent
- c) Impact on age mates

Take as my text Russell, The Great War and Modern Memory

Many differences, of course, but striking parallels:

- ✓ a) Disaster striking - "golden youth" group - poignant memories of recent glory
- ✓ b) The "siege w/out end" - year in, year out; grim humor about this "going on forever"
- ✓ c) The meaninglessness of the catastrophe - no real villains
- ✓ d) The horrors of the front line
- i) e) The slow evolution of a style of "playing it safe, avoiding risks, until this awful thing is over"
- ✓ f) Disillusion of confidence: "Medical [military] progress will conquer this thing in 6 months" - "I hope I can make my mark before it's all over"

WWI - 1985

Survivor guilt

Increased search for enjoyment by survivors

Rise of formerly low-status groups

The glorious fall of the haughty

Rag Tag + bobtail of a society, welded into a whole unit

Interest in mediums to communicate with the dead.

Paradoxical reactions "when it's all over"

Distance from homefront - failure to understand - desire to get back to trenches

Strong loyalty of many to be "in the fray"

Focus on fact of decimation

A dent in the population curve

~~Fussett, Paul~~

~~Remarque, E.M.~~

~~1918 Epidemic~~

Parallels that inform

- a) Survivor guilt - "Why him, and not me?"
- b) Creative enjoyment by survivors - partying gets better
- c) Impressive increase in cohesion of the culture - ragtag and bobtail of a society, welded into a unit
- d) Rise of formerly low-status groups, who just happen not to be among those at risk: ♀ in WWI, aging gays now
- ✓ e) Shattering of confidence in authority: Military/Political establishments in WWI, Medical establishment now
- ✓ f) Distance from homefront - "failure to comprehend what we're going through" - desire to get back to trenches
- g) Increase in paranormal movements - cure through faith, communion with the dead (the raw nerves of severed young love)

1990: Vibrant institutional life & social cohesion

Vibrant social life

(E)

Cynicism about ~~modern~~ Western medicine

More interest in paranormal, spiritualism, alt. forms, etc.

Inclusion of the aged gays

(b) Covering guilt, sadness, horror

will last until 2030 or 2040: generation born 1940-1960 will continue to show a depletion, special sensibility

90-yr old men will compulsively check their skin for lesions

All Quiet on the Western Front

- ✓ ** Young men-- one's friends-- dying horrible, senseless deaths
- ✓ ** Prolongation of this horror, year after year, with no end in sight
- ✓ ** Seeming incompetence of traditional authorities to change anything for the better
- ✓ ** Stupidity of the "Back home" public
- ✓ ** Contrast to a recent golden past

-- All leading to a benumbing of the spirit, a deadening of creativity, an automaton-like performance of duties

"Peace-loving Taxpayers"

'14-18 : Themes

"Never such innocence again" - Philip Larkin

* The Transformation of language, before and early during the war, into the glorious, or "raised".

"There was no..." , portending a future cynicism

The ironic mode of our century: p. 35

* Increase in irony as youthful hope comes up against dread disease

"Will it ~~ever~~ end?" v. "We will win out"

Seropositive cumulatives:

1-1-80	$\frac{1}{2}\%$	300
1-1-81	2%	1400
1-1-82	$6\frac{1}{2}\%$	4500
1-1-83	$17\frac{1}{2}\%$	11500
1-1-84	27%	18900
1-1-85	$34\frac{1}{2}\%$	24100
1-1-86	40%	28000
(1-1-87)	44%	30800

	cumulative predicted morbidity
1	1
8	8
34	34
120	120
349	349
784	784
1388	1388
2088	2088
2828	2828
3587	3587
4341	4341
(5075)	(5075)

- * Never such innocence again (it seemed most beautiful just before it disappeared) (Fa)
 Innocence squeezed, destroyed, or at least transformed.
 Will it ever end?
- Irony p. 35 (Ironic juxtaposition sex/death/disease's ugliness) (Ei)
- * A ridiculous proximity - of death to daily life (Eo)
- * The war will continue to be fought in the psyche (Ef) ✓
- * The role of rumor, belief, doubt of authorities (Eg)
- * The advance of euphemism; also of sentimentality (Eg)
- Also tone-down; unflappable, sang-froid language about horror
- * The mass-production aspects of illness + death; forms, the "we are interchangeable parts" of the 20th C. And we start "playing our parts" with theatrical formality (Eg) ✓
- * Likewise, obits begin to repeat themes. (Eh) ✓
- * Division - into home front (Negatives) France, rear (Positives) ill (front lines)
- * Jokes about official incompetence: "They gave the wrong medicine" "They sent the wrong SS forms again" (Ef) ✓
- * AIDS as backdrop for all narration of gay life of the '80's; we wonder about it, when it's not mentioned. (Eg)
- * "Incessant destruction against a background of the unbearably beautiful" (p. 262) (Ei)
- * 1982 as 1914: The Aesthetic Movement's rediscovery of the erotic attractiveness of young men (p. 281)
 A Shropshire Lad (1896)
- * Sensitive men (Wilfred Owen) feel horror, outrage, pity
 How will IT be remembered? What habits, forms will carry on? (KA)
 Idealization of "youth unscarred"
 Fear → Vivid recall, sharp perception; by contrast, how faded the memories of pleasure (p. 327)
 All Quiet
 Goodbye to All That

WASHINGTON, D. C. 20418

INSTITUTE OF MEDICINE

April 16, 1986

Mr. John Newmeyer
Haight-Ashbury Free Medical Clinic
529 Clayton Street
San Francisco, California 94117

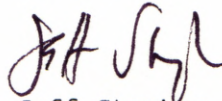

Dear Mr. Newmeyer:

The National Academy of Sciences and the Institute of Medicine are jointly undertaking a rapid, intensive study of national strategies for AIDS research, health care and public health. Two advisory committees, chaired by Dr. David Baltimore (MIT) and Dr. Sheldon Wolff (Tufts University Medical School), have been empaneled to address a host of questions occasioned by the AIDS epidemic. A charge to the committees and a complete roster is enclosed.

Unfortunately, the first meeting of these committees coincided with the National Lesbian/Gay Health Conference held in March at George Washington University. Hence, we are interested in knowing whether we might receive a written summary of your presentation, "Demographic Catastrophe and Social Adaptation: The Impact of AIDS." Of course, if you have any additional published materials which might illuminate the committees' deliberation, we would be happy to make them part of the record.

Thank you.

Sincerely,

Jeff Stryker
Project Officer
Committee on a National Strategy
for AIDS

NAS/IOM COMMITTEE TO ASSESS NATIONAL STRATEGIES
FOR AIDS RESEARCH AND HEALTH CARE

FOR IMMEDIATE RELEASE

WASHINGTON - The National Academy of Sciences (NAS) and the Institute of Medicine (IOM) have launched an intensive, six-month study to assess national strategies for scientific research, health care delivery, and public health measures in response to the growing national and international problem of AIDS (Acquired Immune Deficiency Syndrome).

The study was initiated by the governing Councils of the NAS and the IOM to provide an independent setting for identifying public and private sector policies most likely to accelerate development of effective research, prevention, and treatment of the disease.

The joint NAS/IOM study will be conducted by two panels and a coordinating steering committee.

(OVER)

SEVENTH NATIONAL LESBIAN/GAY HEALTH CONFERENCE -- FOURTH NATIONAL AIDS FORUM

WORKSHOP PROPOSAL FORM

1. Type within lines: Workshop title and proposal.

DEMOGRAPHIC CATASTROPHE AND SOCIAL ADAPTATION:
THE IMPACT OF A.I.D.S.

A "demographic catastrophe" is here defined as a phenomenon which removes more than one-twentieth (5%) of an otherwise healthy population within a short period. By this definition, it is likely that at least three American populations will suffer demographic catastrophes during the period 1983-1987, as a result of AIDS: (1) sexually active gay male San Franciscans; (2) sexually active gay male New Yorkers; and (3) intravenous drug-using New Yorkers. Some observers have speculated that such catastrophes will seriously disrupt, and possibly destroy, the social cohesion which had existed in these populations prior to 1983.

The author, an epidemiologist and social historian, presents evidence that the opposite may be the case. He notes that social cohesion among young British and Australian male populations actually increased between 1914 and 1918, in spite of heavy mortality in those cohorts resulting from the First World War. There are striking parallels with the present AIDS crisis, both in the kind of social adaptations occurring among the young males, and in the sequencing of those adaptations.

The author concludes with an analysis of some themes reasonably to be expected in later phases of the AIDS epidemic, in particular, "survivor guilt", "delayed grief", and "consumption mania".

2. Name of presenter(s) John A. Newmeyer, Ph.D.

Affiliation/Organization Haight-Ashbury Free Medical Clinic

Address 529 Clayton Street, San Francisco, CA 94117

Phone (415) 431-2450

3. Attach recent copy of curriculum vitae for all presenters.
4. Return four copies of this form to: NLGHF, Conference '85, P.O. Box 65472, Washington, D.C. 20035. Must be received by April 10, 1985.

Morin/McCurich Study (Nov. 1983) (N=1,100)

- Major reduction in high-risk behavior, as per RR guidelines
- Major increase in awareness.

Took not a random, but a "contrast" sample:

Bath sample

Ads in gay paper "not to bars/baths in past 2 months"

Men in committed relationships

Bar sample

Info related little to behavior change

Knowing some w/ AIDS helped a lot to motivate healthier behavior among the

MODEL FOR EDUCATION IN "SAFE SEX"

- 1) Perceived threat (real danger, and pertinent to me)
- 2) Response efficacy - (what actions can truly make a difference)
- 3) Personal efficacy - (can I go through with these changes)
- 4) Skills attainment - (social skills) - (uncomfortable to talk about these things? Do I know what to say?)
("A learned ability to say 'no'")
- 5) Peer support
- 6) Alternatives

Visualization an actual hindrance - many see like not the hearing a hint "what we will do"!

"Sagesex" and "Intimacy" as "products to sell to the consumer"

Posters at the bathhouses - not that efficacious

Zero risk unattainable?

Regretment ~~among~~ found among those forced to make the adjustment.

**FURTHER RESEARCH QUESTIONS
(CONTINUED)**

3. DOES THE ACQUISITION OF SEROPOSITIVITY TO LAV/HTLVIII DECREASE WITH SPECIFIC BEHAVIORAL CHANGES AND DOES ALTERED RATE OR MODE OF EXPOSURE TO SPECIFIC PUTATIVE AIDS ETIOLOGIC AGENTS ALTER THE TRANSMISSION OF THE CLINICAL SYNDROME?

4. WHAT CHANGES ARE OCCURRING IN OTHER ASPECTS OF BEHAVIOR AND EMOTIONAL HEALTH OF GAY MEN IN ASSOCIATION WITH THESE DRASTIC SEXUAL, SOCIAL AND IMMUNOLOGICAL ALTERATIONS?

SURVEY

- (1) Have you ever seen this brochure before today? YES (29) NO (31)
(If "No", skip to Question 3)
- (2) How did you happen to see it? 24 - at HAFMC
1 - Friend 1 - BART
1 - Found on Haight St. 2 - DK, NA
- (3) Have you heard of AIDS disease? YES (60) NO (0) (If "No", ask only Question 5)
- (4) Has the threat of AIDS disease changed the way you use drugs?
YES (28) NO (32) (If "Yes":) How? 23 - reduce or eliminate sharing
6 - smoke, snort, otherwise not share pattern 3 - "be more careful" or "scared" 11
2 - use new needles only 11
2 - clean my needles 11
- (5) Do you ever share needles when you use drugs? YES (32) NO (28)
(If "Yes":) How many different people have you shared needles with in the past 12 months?
1x = 3 0 = 12 5-7 = 3
3x = 1 1 = 9 8-10 = 2
10x = 1 2 = 7 11-20 = 4
20x = 1 3-4 = 7
40x = 1
- (6) Do you believe that sharing needles puts you at risk for getting AIDS disease? YES (54) NO (2) (If "No":) Why not? ① ③
Maybe DK, NA
- (7) What steps do you think you can take to reduce your risk of getting AIDS? 31 - Don't share needles 5 - DK
16 - Cut down or stop use of drugs 1 - Be heterosexual
13 - Don't use needles to use drugs
4 - Share carefully
4 - Clean your needles

80 Eighth Avenue
Suite 1305
New York, N.Y. 10011

Dear People:

This is a brief summary of the contents of my presentation:

"The Haight-Ashbury Free Medical Clinic created a brochure, 'Shooting Up and Your Health', as a means of public education among intravenous needle users who are at risk for AIDS. Energetic efforts were made by all large drug treatment agencies in San Francisco to distribute this brochure to needle users. The author surveyed a sample of IV drug users newly admitted to treatment in early 1984, and found (1) that IV drug users generally believe sharing needles puts them at risk for contracting AIDS; (2) that a substantial majority of IV users had a history of more than occasional needle-sharing; (3) that users generally intended to change their needle-using in response to the danger of AIDS, with intention evenly divided between 'obtaining my own works' and 'quitting altogether'; (4) that these intentions were subject to a failure rate on the order of 70%; (5) that the potential for community self-help among heterosexual IV users is essentially nonexistent, in the event of an AIDS epidemic in that population; and (6) that the 'Shooting Up and Your Health' brochure was an effective disseminator of information among IV drug users. The author also found that, in San Francisco, homosexual IV drug users were predominantly users of methamphetamine, while heterosexual IV users were predominantly heroin users. These two groups had markedly different patterns of usage, sharing behavior, and attitudes toward drugs."

My name, degrees, specialties, and address are as follows:

John Newmeyer, Ph.D.
Specialist in drug abuse epidemiology and demography
Haight-Ashbury Free Medical Clinic
529 Clayton Street
San Francisco, CA 94117
(415) 431-2450

Sincerely,

Don
Loewy
