Mr. Les Stromberg
Farm Advisor
Room 20, Post Office Bldg.
Fresno 1, California

Dear Les:

I spent a couple of hours Thursday morning talking to Ed Griffith informing him of what we had done and what we plan to do. He mentioned that he thought I might have difficulty finding many of our test wells operating as most of them are shut down at this time. This was certainly the case. Out of the 10, there were only 3 in operation. The names and strip numbers are as follows:

Half Moon	Strip number 10
Giffen #6	Strip number 19
Hammond #14	Strip number 17

I stopped at each of the headquarters to inquire when operation might begin and they all had about the same story, indicating that it would be the latter part of May or perhaps the first of June. Therefore, it would not be necessary to install additional strips until the last week in May.

Giffen's headquarters indicated that wells 64 and 20 may not be used this year. I asked if another well could be substituted and they suggested number 23, which is one mile north of the headquarters buildings.

If you are out on the west side during the week of May 17 - 21, and it is convenienent, you might inquire if the wells of Giffen, Hammond, Calflax and Murietta are operating.

Very truly yours,

Scotty

V. H. Scott
Assistant Irrigation Engineer
