Dear Mr. Cousins:

Pat Wally gave me your name to contact in regards to where I might get materials for the 4-H electric projects.

As you probably know I used to get my kits from Lyons Electric Company in San Diego but when I sent my last order in they replied by stating they no longer handled the 4-H electric kits.

I am specifically interested in finding out where I can get the voltage tester kits. Do you buy them as kits or separate materials and then assemble the kits?

Any information in regards to these kits would greatly be appreciated.

Thank you.

Sincerely,

Ron Vargas
4-H Farm Advisor
