4-H.....A HEALTHY ENVIRONMENT AND A FUN WAY TO LEARN

You have probably heard the term "4-H" before and wondered what it is and how you and your family could become involved.

4-H is a group of youths ranging in age from nine to eighteen. The program is directed by the University of California and designed to promote agriculture, economics, as well as a wide variety of interesting projects. Volunteers teach the various projects with assistance available from University and 4-H staff as needed. The program is divided into clubs geographically and each club offers individual projects of interest. Each 4-H year usually begins in October and goes through the following September.

You have probably recognized some of our members by their clean, white shirts, green hats, ties or scarves. These youths are dedicated, hard working individuals that take their projects seriously. Many of these members have traveled state and nationwide in our program competing, growing and learning.

All of our 4-H leaders are volunteers sharing their time with youths who expressed an interest in their project. The program is always ready for growth and expansion. If you have a trade or a hobby you would like to share as a short term or long term project, we would love to have you. If you have a youth interested in our program, just call. We work hard at providing a well-rounded, active and healthy environment.

To find out more about 4-H, call a leader you may know, a 4-H member or the UC Cooperative Extension office at 966-2417. In the meantime, when you see a 4-H'er, give him/her a handshake, they are working hard and we hope they will grow up to be responsible adults.

At the beginning of the study, a group of 10 agricultural researchers, 5 men and 5 women, was selected to participate in the study. The group was selected based on their knowledge of the agricultural sector and their interest in the study. As a result, with sufficient and consistent training that takes full account of the individual's as well as the group's, the program is always ready to provide participants with a new level of understanding and a new way of seeing the world. The program is always ready to help them become self-reliant and to help them find their own way to a better life. The program is always ready to help them find their own way to a better life.
