August 5, 1985

Dear Michael,

Thank you for agreeing to come to the Sepulveda VA Medical Center for a Department of Medicine Grand Rounds on AIDS on Thursday, October 17. The VA Hospital is located at 16111 Plummer Street (take the Nordhoff exit off the San Diego Freeway), and the meeting will convene at 8:30 AM in Room B-339, Building 3 (the main hospital building opposite the flagpole). We will of course provide a slide projector for your audiovisual materials.

The audience for this presentation will consist primarily of internal medicine housestaff and faculty, although the topic may also draw some representatives from other services. Most of our physicians are familiar with the basic clinical complications of AIDS, but I am sure that they would appreciate an update on the epidemiology, experimental therapeutics and research directions of the disease. No doubt you will also want to schedule some open time for questions from the audience.

Once again, I am very pleased that you are coming on October 17, and I look forward to your interesting talk.

Sincerely yours,

*Claire*  
Claire B. Panosian, M.D.

Chief of Infectious Diseases  
Olive View Medical Center

Assistant Professor of Medicine  
UCLA School of Medicine
