## LABORATORY TEST(S) ORDERED

### Parental Carrier Screening

Is the patient of 100% Ashkenazi Jewish descent?  YES  NO  
 If not, ethnic background: \_\_\_\_\_

Is the patient or their partner pregnant?  YES  NO  
 Is the patient currently using birth control medication?  YES  NO  
 Had the patient had previous carrier screening?  YES  NO  
 Specify: \_\_\_\_\_

Expanded Carrier Screen (283 genes)  X-linked supplemental panel (21 genes)  
 Standard Pan-ethnic Panel (4 genes)  Single Gene \_\_\_\_\_ Variant(s) \_\_\_\_\_  
 High Frequency Pan-ethnic Panel (11 genes)  Phase analysis  PGD set-up  
 ECS 39 (39 genes)  Test only for AR disorders partner screened positive for - hold sample pending partner results (mark on reverse side or list here): \_\_\_\_\_  
 ECS 152 (152 genes)  NGS re-analysis of ECS 281 + enhancements included in ECS 283. Previous test order date: / /  
 Comprehensive Jewish Carrier Screen (101 genes)  Other \_\_\_\_\_  
 Ashkenazi Jewish Disorders (47+17 genes)  
 Sephardi-Mizrahi Jewish Disorders (37+17 genes)

### Infertility/Pregnancy Loss

Test for Microdeletions of Y Chromosome (male)  Thrombophilia Test (2 variants below)  
 Cystic Fibrosis with CFTR Intron 9 PolyT (male)  F2 - c.\*97G>A  F5 - c.1601G>A (p.Arg534Gln)  
 MTHFR - c.665C>T (p.Ala222Val) add-on

### Cytogenetics and Cytogenomics

#### CHROMOSOME ANALYSIS

Chromosome Analysis (includes AFP with amniotic fluid)  Additional Cell Culture:  Hold  Grow  
*Includes reflex to array if no growth*  Mosaicism study  
 Reflex to array if normal chromosomes

#### CHROMOSOMAL MICROARRAY: Array Comparative Genomic Hybridization (aCGH) 180K + SNP

For prenatal specimens, please submit maternal blood for Maternal Cell Contamination (MCC)  
 Prenatal chromosomal microarray (lower resolution)  High Resolution Chromosomal Microarray  
 Include blood (1 EDTA purple top, 1 Sodium heparin green top) from the parents of the proband/pregnancy if available.  Included \_\_\_\_\_ mother \_\_\_\_\_ father

**POC MICROARRAY PLUS:** Includes high resolution microarray analysis, triploidy detection, UPD analysis, molar pregnancy analysis and MCC studies with submission of maternal blood or saliva sample. Include blood (1 EDTA purple top, 1 Sodium heparin green top) from the parents of the pregnancy if available.  
 Included \_\_\_\_\_ mother \_\_\_\_\_ father

### NONINVASIVE PRENATAL TEST (NIPT) MENU - select only one

**MaterniT GENOME**  
Genome-wide fetal aneuploidies (singleton only)

**MaterniT21 PLUS**  
Select fetal aneuploidies  
 Core (chr 21, 18, 13, sex)  
 Core + ESS\*  
 Core + SCA\*\*  
 Core + ESS + SCA

\*ESS = chr 16, chr 22, and select microdeletions \*\*SCA = sex chromosome aneuploidies

#### REQUIRED CLINICAL INFORMATION

Specimen Required: Two 10 mL Whole Blood BCT Streck Tubes

**Gestational age:** \_\_\_\_\_ weeks \_\_\_\_\_ days or EDD: / /  
**Gestation**  Singleton  Twins  Triplets  Other: \_\_\_\_\_  
 Maternal height: \_\_\_\_\_ ft. \_\_\_\_\_ in. Maternal weight: \_\_\_\_\_ lbs.

#### MEDICAL INDICATION FOR TESTING **!** Select one or more ICD10 codes

### FLUORESCENT in situ HYBRIDIZATION (FISH)

Aneuploidy FISH (chromosomes 13,18,21,X,Y)  
 Microdeletion FISH Panel (13 disorders)  
 Angelmann Syndrome (15q11.2)  Rubinstein-Taybi (16p13.3)  
 CHARGE (8q12.1 - q12.2)  Smith-Magenis Syndrome (17p11.2)  
 Cri-du-chat Syndrome (5p15.2)  Sotos Syndrome (5q35)  
 DiGeorge/Velo-Cardio-Facial Syndrome (22q11.2)  Williams Syndrome (7q11.23)  
 Langer-Giedion (8q23.3 - 8q24.11)  Wolf-Hirschhorn Syndrome (4p16.3)  
 Miller-Dieker Syndrome (17p13.3)  1p36 deletion syndrome (1p36.3)  
 Prader-Willi Syndrome (15q11.2)

FISH other: \_\_\_\_\_  
 FISH for Kallman Syndrome  
 FISH for STS Deficiency  
 FISH for SRY deletion

### Prenatal Diagnostic Testing

FGFR3 Hotspot Panel  Maternal Cell Contamination  
 reflex to sequencing if negative  Other: \_\_\_\_\_  
 Limb Defects Next Gen Sequencing Panel (7 genes)  
 Noonan Syndrome Next Gen Sequencing Panel (14 genes)  
 Single gene/Diagnostic testing  
 Gene: \_\_\_\_\_  
 Targeted testing: Maternal variant: \_\_\_\_\_ Paternal variant: \_\_\_\_\_  
 Biochemical testing:  Tay Sachs Enzyme  Sandhoff enzyme

• Maternal blood is required for all prenatal specimens for maternal cell contamination.  
 • If patient/partner was NOT tested at Sema4, parental bloods are required (5-10mL EDTA) to confirm the variant in-house. Please also provide a copy of any previous results.  
 • Please contact the laboratory for all prenatal molecular/biochemical testing

## Informed Consent for Genetic Testing

I, \_\_\_\_\_, hereby request genetic testing, which may include molecular, cytogenetic and/or biochemical analyses, for

Myself

My child \_\_\_\_\_

I have received verbal and written information (please see [sema4.com/testcatalog](http://sema4.com/testcatalog) for test-specific information sheet) from my physician or from a genetic counselor that described, in words that I understood, the nature of the genetic testing that I/my child am about to undergo.

I understand that specimen(s), such as a peripheral blood, saliva, cheek swab, dried blood spot, skin biopsy, amniotic fluid, chorionic villi and/or urine sample, will be taken from me/my child. I understand that the samples will be used for determining if I/my child have a genetic disease, are carriers of a genetic disease, or are more likely to develop a genetic disease or condition.

The nature of the genetic test, \_\_\_\_\_, has been explained to me and the accuracy of the test and its risks and limitations have been detailed. I understand that infrequent errors may occur, even though the likelihood of an incorrect diagnosis or a misinterpretation of the result is extremely small. The likelihood of this occurring has been estimated to be less than 1%. I understand that a negative result reduces, but does not eliminate, the possibility that I/my child carry a mutation(s) in the gene(s) analyzed or in other gene(s) that are not included in the test.

I understand that no test will be performed on my sample other than the one(s) authorized by this consent and my doctor.

### De-identified research

Sema4 may also give the de-identified information to its research partners and may submit this de-identified information to research databases for use in scientific and medical research, including scientific databases that are maintained by the federal government, such as a database kept by the National Institutes of Health ("NIH") (an agency of the federal government that funds research). Researchers have to apply to the NIH to see the information in the database. Any information that could directly identify you (such your name or address) will not be provided to a scientific database.

If I prefer not to have any of my/my child's de-identified health information used in research consistent with this consent, I may initial here \_\_\_\_\_ or request this by contacting Sema4, including by emailing [privacy@sema4.com](mailto:privacy@sema4.com).

### Permission to contact

I understand that Sema4 may wish to contact me/my child in the future, including for the following reasons: research purposes, the provision of general information about research findings, and/or the provision of information about the results of tests on my/my child's sample(s). I understand that I may notify Sema4 to opt out of such future contact, including by emailing [privacy@sema4.com](mailto:privacy@sema4.com).

I understand that this testing may yield results that are of unknown clinical significance and that parental or other relative's specimens may also be tested to determine whether a specific finding was inherited. In addition, incidental findings that are not related to the primary diagnosis may be identified in me/my child. An error in the diagnosis may occur if the true biological relationships of the family members involved are not as I have stated and this test may detect non-paternity.

The results of my/my child's test will be explained to me by a genetic counselor or by my physician who will have the opportunity to discuss my results with a geneticist. I have had the opportunity to have all of my questions answered. If I am signing this form on behalf of a minor for whom I am the legal guardian, I am satisfied that I have received enough information to sign on his or her behalf.

I understand that this consent is being obtained in order to protect my right to have all of my questions answered before testing. I understand that the results of this testing will become part of my medical record and may only be disclosed to individuals who have legal access to this record or to individuals who I designate to receive this information.

### Sample storage

\_\_\_\_\_  
*Initials*

By initialing here, I agree that Sema4 may store, de-identify, and use my/my child's sample and information to support medical and academic research relating to health, disease prevention, drug development, and other scientific purposes, and that I/my child will receive no compensation in connection with such research. If I do not initial here, my/my child's sample will be destroyed at the end of the testing process or not more than 60 days after collection. I understand that I may withdraw this consent by contacting Sema4 (including by emailing [privacy@sema4.com](mailto:privacy@sema4.com)).
