

# Simple Traffic System

How to get all the free website traffic you want!

Hi, I'm Ed Kirwan and I'll get straight to the point. I'm going to show you how to get all the free traffic you want with 2 methods in 3 simple steps. Ready?

Follow the 3 Steps below for unlimited traffic.

## Step #1

Lets start with Method 1 and get some instant visitors to your website, Click [HERE](#) and join as a free member - download the software under the "Earn Traffic" tab and let it run in the background on your desktop. See instructions how it works below.

Now you already getting traffic - NOTE: this works best for lead capture or bridge pages.

Also use this for giving a traffic boost to any site or video and affiliate links will work too.

## How to Get Started:

On the front page is a graph that shows you how many minutes you've earned and how many clicks you've had. The graph updates as you work.

Enter your website url/s under 'My Websites'. You can set the viewing time to whatever you feel like it and whatever will suit your needs the best.

Your link will be 'under review' for about five to ten minutes, after which it will be added to the 'Traffic Exchange'.

To get clicks on your site you will need to spend 'minutes' which you can earn in 'Traffic Exchange'.

You have two options in earning minutes:

1. Download the Viewer Software. This is a desktop application you install and run in the background. All the time it is running you earn minutes to spend on views to your website.
2. Using the Viewer in browser.

Whichever option you've chosen to use, you will now be earning minutes from it. Those minutes will automatically be spent getting you hits.

## **Step #2**

I really love Method 2 - real people clicking on your website link because they are interested in your headline. Maybe you already know about it but you can get much much more out of it if you do as I do.

I get about 50 - 100 real visitors to my site every day with only 5 minutes of work every third day.

Just follow these simple steps:

Create a brand [new gmail account](#) with your real first and last name and remember to make a note of your login info.

Then [join THIS site](#) as a free member.
