

STRINGTone®

FOR ORCHESTRAL INSTRUMENT PARTS AND STRINGS

Beyond Strings Multi-Zone Application Technology

Unmatched versatility in a music instrument maintenance product allowing for discrete or blanket applications.

StringTone® covers maintenance and conditioning from the headstock to the bridge for string bass, bass guitar, and a wide range of other string instruments.

- A.** Lubricates tuning gears and shafts for smoother operation
- B.** Protects gold and chrome plated parts from oxidation and corrosion
- C.** Reduces nut saddle friction and wear
- D.** Microfilm protects fretboard against skin oils and salts
- E.** Safely removes spent rosin from catgut strings
- F.** Will not harm neck, delaminate fretboards or bindings
- G.** Less toxic than denatured alcohol for cleaning and will not dry out wood
- H.** Contains no silicone or Teflon that builds up on strings and attracts dirt
- I.** Less string stress and notch wear for friction-free operation of bridge saddles
- J.** Eliminates noise, pops and clicks from jacks and plugs attached to clip-on bridge mics
- K.** Lubricates fine tuning mechanisms to ensure smooth adjustment and accurate intonation
- L.** Will not harm finishes and resists fingerprints
- M.** Lubricates and protects end pin adjusters

Technical Information for repair

SoundSynergies® STRINGTone® satisfies the maintenance and lubrication demands of guitarists, bassists, and virtually all other string instrument players. The result of research and development in micro-barrier technologies for ballistics, STRINGTone® is unequalled in its ability to penetrate and lift away deeply embedded grime, rosin and microscopic debris particles. allowing treated bass strings to vibrate without restriction for superior sustain and richer sound quality. STRINGTone® dries to the touch in seconds and strings are ready to play.

Regular Bass Guitar Maintenance

StringTone® lets musicians and techs maintain their instruments consistently for a professional level of performance. A small investment in STRINGTone® makes an affordable alternative to more expensive products that are less effective and require multiple applications of different products.

Protection That Lasts

STRINGTone® offers long-lasting protection from grime and corrosion to lengthen the life of strings and other metal instrument components. STRINGTone's gentle formula is safe for all instrument woods, resists migration and won't build up. STRINGTone penetrates deep to the string core to remove dust and debris.

A Difference You Can Hear

Among the benefits of using STRINGTone® are: increased dynamic range; enhanced upper and bass frequencies; and richer harmonics. Controlled tests in an acoustic laboratory have verified STRINGTone® effectiveness. Treatment with STRINGTone® was found to significantly improve the dynamic range and overall frequency response of guitar and bass strings.
