

# PROcussionCare®

CYMBALCARE FOR CYMBAL  
CONDITIONING AND PROTECTION

PEDALLUBE FOR KICK PEDAL  
AND HI-HAT ASSEMBLIES

## CymbalCare & PedalLube Multi-Zone Application Technologies

Unmatched versatility in music instrument  
and gear maintenance products allowing  
for discrete or blanket applications.

**HEAR AND FEEL THE DIFFERENCE®**  
Comprehensive Maintenance Technologies.  
*Lowest cost per use.*

## PROcussionCare®

CymbalCare is free of harmful  
polishes & conditions cymbals  
for maximum response, sound,  
and appearance.

**PedalLube micro-lubricating  
formula maximizes kick pedal  
speed and response while  
silencing squeaks and noises.**

- A.** Lubricates mounting stem assemblies and reduces center flex stress
- B.** Cleans, conditions, and protects all cymbal surfaces to block oxidation and corrosion
- C.** Reduces cymbal surface tension preventing the creation of micro fissures and cracking
- D.** Reduces black oxide stick tip transfer to drum heads
- E.** Lessens impact damage and surface marring
- F.** Lubricates mounting hardware and tubes for smoother operation
- G.** Protects all metal finishes from oxidation, pitting and corrosion
- H.** The only lubricant with HD4X® specially formulated for drum pedals
- I.** Cleans and lubricates u-joints and drive shaft assemblies
- J.** Treat beater heads to reduce impact damage and extend head life
- K.** Removes grime and contaminants for smoother, quieter playing action
- L.** Lubricates all chains, linkage and pivot arms without migrating or attracting dirt
- M.** Wipe down all metal surfaces to reduce abrasion and protect against oxidation and corrosion
- N.** Reduces pedal lag time with noise-free, fluid, and instantaneous response
- O.** Increased protection for high-stress points and heavy-duty cycle applications

## An overview of CymbalCare & PedalLube

CymbalCare provides the ultimate in effective, safe conditioning for cymbals, maximizing cymbal response, sound, and appearance. PedalLube is a micro-barrier conditioning and lubricant formula that increases drum kick drum pedal response while preventing excess wear and silencing squeaks and noise.

## CymbalCare - Technical Information for Cymbal Care and Repair

CymbalCare is designed to lift away and remove dust and grime without damaging the cymbal's patina, or thin oxidation coating. Many cymbal-cleaners strip the patina, giving cymbals a harsh, too-bright sound quality. CymbalCare will remove excess grime for a natural shine that preserves the patina, and restores natural tonal spectrum and overtones, enhancing sticking definition and response.

## PedalLube - Technical Information for Kick Pedal Care and Repair

PROcussionCare® PedalLube is a specialized lubricant formula that cleans, lubricates, and conditions the kick pedal and other hardware. A remaining micro-thin lubricant barrier silences noises and creates smooth, effortless playing response. Using the included applicator and a lint-free cloth, treatment takes just minutes. PROcussionCare® is recommended for kick pedals, hi-hat stands, thrones, mounts, and all other moving metal parts of the drum set.

## Environmentally Responsible, Uniquely Effective

The PROcussionCare® proprietary formulations are non-toxic and the result of years of research and development in flex-film technologies, and has been a cornerstone of private label products since 1986.
