

mCORE To Provide Cardiac Screening Opportunity for Beaumont School Students Ages 12-22 Years

PREVENTATIVE HEART SCREENINGS

The American Heart Association says 1 in 100 kids has an abnormality they do not know about. mCORE partners with over 200 schools, hospitals and organizations to give convenient and dependable heart screenings to students.

mCORE will be offering both EKG and Echo tests for each student-athlete. All screenings are preformed by Registered Diagnostic Cardiac Sonographers and results are read by the mCORE Medical Director. This is a great opportunity to have these screenings done in a convenient and cost effective manner. Providing families with a baseline for their child that can be given to their medical provider. If your child has previously been screened the AHA recommends every two years during high school.
