

HEADS*UP CONCUSSION IN HIGH SCHOOL SPORTS

A FACT SHEET FOR **PARENTS**

What is a concussion?

A concussion is a type of traumatic brain injury. Concussions are caused by a bump or blow to the head. Even a “ding,” “getting your bell rung,” or what seems to be a mild bump or blow to the head can be serious.

You can’t see a concussion. Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury. If your child reports any symptoms of concussion, or if you notice the symptoms yourself, seek medical attention right away.

What are the signs and symptoms of a concussion?

If your child has experienced a bump or blow to the head during a game or practice, look for any of the following signs of a concussion:

SYMPTOMS REPORTED BY ATHLETE	SIGNS OBSERVED BY PARENTS/GUARDIANS
<ul style="list-style-type: none"> • Headache or “pressure” in head • Nausea or vomiting • Balance problems or dizziness • Double or blurry vision • Sensitivity to light • Sensitivity to noise • Feeling sluggish, hazy, foggy, or groggy • Concentration or memory problems • Confusion • Just “not feeling right” or “feeling down” 	<ul style="list-style-type: none"> • Appears dazed or stunned • Is confused about assignment or position • Forgets an instruction • Is unsure of game, score, or opponent • Moves clumsily • Answers questions slowly • Loses consciousness (even briefly) • Shows mood, behavior, or personality changes

How can you help your child prevent a concussion or other serious brain injury?

- Ensure that they follow their coach’s rules for safety and the rules of the sport.
- Encourage them to practice good sportsmanship at all times.
- Make sure they wear the right protective equipment for their activity. Protective equipment should fit properly and be well maintained.
- Wearing a helmet is a must to reduce the risk of a serious brain injury or skull fracture.
 - However, helmets are not designed to prevent concussions. There is no “concussion-proof” helmet. So, even with a helmet, it is important for kids and teens to avoid hits to the head.

What should you do if you think your child has a concussion?

SEEK MEDICAL ATTENTION RIGHT AWAY. A health care professional will be able to decide how serious the concussion is and when it is safe for your child to return to regular activities, including sports.

KEEP YOUR CHILD OUT OF PLAY. Concussions take time to heal. Don’t let your child return to play the day of the injury and until a health care professional says it’s OK. Children who return to play too soon—while the brain is still healing—risk a greater chance of having a repeat concussion. Repeat or later concussions can be very serious. They can cause permanent brain damage, affecting your child for a lifetime.

TELL YOUR CHILD’S COACH ABOUT ANY PREVIOUS CONCUSSION. Coaches should know if your child had a previous concussion. Your child’s coach may not know about a concussion your child received in another sport or activity unless you tell the coach.

If you think your teen has a concussion:
Don’t assess it yourself. Take him/her out of play.
Seek the advice of a health care professional.

It’s better to miss one game than the whole season.

CONCUSSION AWARENESS EDUCATIONAL MATERIAL ACKNOWLEDGEMENT FORM

By my name and signature below, I acknowledge in accordance with Public Acts 342 and 343 of 2012 that I have received and reviewed the Concussion Fact Sheet for Parents and/or the Concussion Fact Sheet for Students provided by:

Sponsoring Organization

Participant Name Printed

Parent or Guardian Name Printed

Participant Name Signature

Parent or Guardian Name Signature

Participant Grade

School Year

Date

Date

Return this signed form to the school or coach that must keep on file for the duration of participation or age 18.

Participants and parents please review and keep the education materials available for future reference.

SCHOOL CONCUSSION REPORTING

Schools must report concussion events online while logged into MHSAA.com. Report any concussion event in all levels of all MHSAA sports where a student is withheld from activity. This is a separate process from the Return to Activity and Post-Concussion Consent Form on the reverse side.

MHSAA CONCUSSION CARE INSURANCE

The Michigan High School Athletic Association is providing athletic participants at each MHSAA member junior high/middle school and high school with additional insurance that is intended to pay accident medical expense benefits resulting from a suspected concussion. The injury must be sustained while the athlete is participating in-season at an MHSAA covered activity. Policy limit is \$25,000 for each accident. Covered students, sports and situations follow the catastrophic accident medical insurance.

This new program intends to assure that all eligible student-athletes in MHSAA member schools in grades 6 through 12, male and female, in all levels of all sports under the jurisdiction of the MHSAA, receive prompt and professional attention for head injury events even if the child is uninsured or under-insured. Accident medical deductibles and co-pays left unpaid by other policies are reimbursed under this program to the limits of the policy.

The Concussion Care Insurance corresponds with the MHSAA Catastrophic Accident Medical Insurance Policy which pays up to \$500,000 for medical expenses left unpaid by other insurance after a deductible of \$25,000 per claim in paid medical expenses has been met. All students enrolled in grades 6 through 12 at MHSAA member schools who are eligible under MHSAA rules and participating in practices or competition in sports under the MHSAA's jurisdiction are covered by this policy for injuries related to their athletic participation.

CONCUSSION INSURANCE CLAIMS ADMINISTRATOR ADDITIONAL INFORMATION
