Mayfield Volleyball Families,

We were informed today that a member of the volleyball program tested positive for COVID-19 after taking a rapid result test. She has no symptoms but decided to take the test for her own peace of mind after being at a location with an individual who ended up COVID-positive. She did not have any direct contact with the individual.

Since these tests are not 100% reliable, she has followed up with a more reliable test, the results of which will be back on Monday. Until further notice, we must suspend all volleyball activities. If you feel the need to have your daughter tested, please do so. The district is consulting with the Cuyahoga Board of Health. We will follow their guidance and will provide you with more information when we have it.

Thank you,
Keith Leffler
Mayfield High School Athletics Administration
