Why Futsal?

According to a Liverpool study, Futsal players touch the ball 6 times more often- per Minute! The smaller, heavier ball demands and rewards more precise handling. Sharp passing is paramount: The game is all about looking for angles and spaces and working quick combinations with other players. Ball control and vision are crucial, so that when futsal players play the full size game, they feel as though they have acres of free space in which to operate. "No time + No space = BETTER SKILLS."
