

Special Population Support – Accessibility

Rich digital curriculum and tools for individualizing student learning paths give each student the ability to achieve success. Courses are designed to engage students with different learning styles and abilities, utilizing interactive learning assets that provide both visual and auditory stimulation. Using leading technology solutions, our courses offer rich, rigorous, standards-aligned multimedia lessons. Students interact with this content via multiple presentation formats, including photos, visual learning animations, videos, interactive text, and both guided and independent practice activities. These resources are especially powerful for relating instructional concepts to real-world contexts.

Online courses contain the following accommodations for students:

- Content is appropriately segmented into smaller topics to increase retention and expand opportunities for assessment.
- Limited text on each screen provides increased focus and allows additional time to devote to practice activities.
- Content includes video and motion multimedia components, which provides students with opportunities to use visual, kinesthetic, and auditory learning methods.
- Students can work at their own pace, without specific time constraints.
- Content is open for students so they can refer to previous content as needed.
- For some graded assignments/quizzes, students can redo the work and resubmit these assignments.

Courses have been carefully designed to meet a broad range of learner needs, and provide supporting accommodations for English language learners and those with special needs.

- **Text to Speech** – All courses come equipped with text to speech software to help students who may have deficiencies or trouble reading.
- **Audio and Text Translation** – For monolingual or ELL students, our software allows for both text and audio translations in multiple languages.
- **Dictionary Definitions** – Two dictionary options (written words and pictures) are available in context.
- **Text Magnifier** – Text magnifier magnifies text highlighted in a single row at the top of the page in dual colors of choice.
- **Adaptive Pre-Assessment** – Adaptive pre-assessment allows for the creation of Individualized Learning Plans catered to each students' needs, skill levels, and requirements.
- **Teacher Toolset** – Our software gives the teacher the power to personalize the curriculum, create adaptive modules, and assess each student.
