

# Lunar Explorations:

## 11. Linne

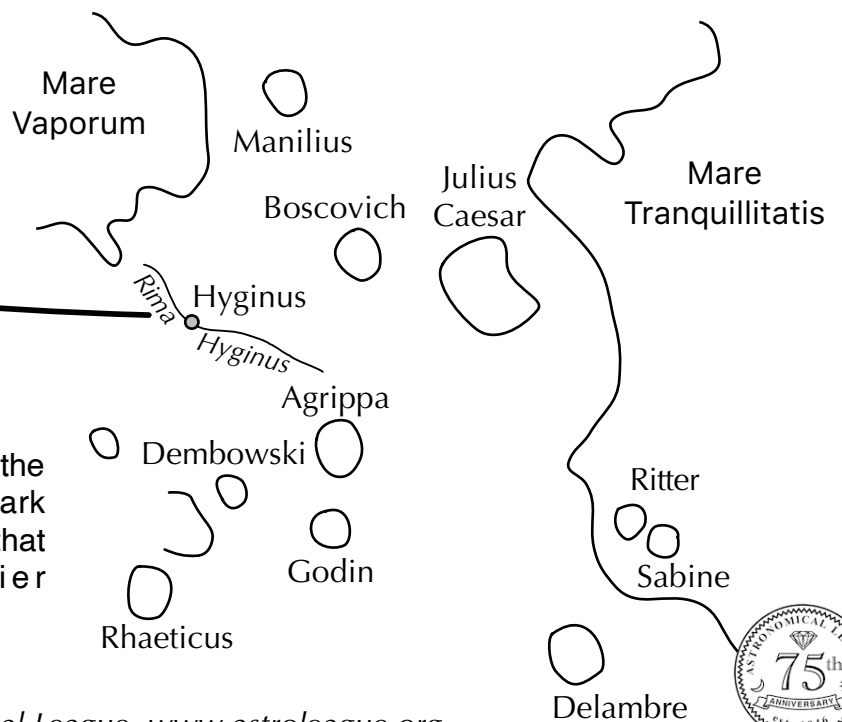

Best seen: April 1 and 2; April 19, 2021.

1866. Johann Frederich Julius Schmidt, followed by others, thought that the small crater Linne had been damaged or transformed by unknown agents.

# Lunar Explorations:

## 12. Hyginus N

Best seen: April 1; April 19, 2021.

1877. Hermann Klein, Director of the Cologne Observatory, found a dark patch near Hyginus crater, one that hadn't been visible in earlier observations.
