

# Lunar Explorations: 7. Messier and Messier A

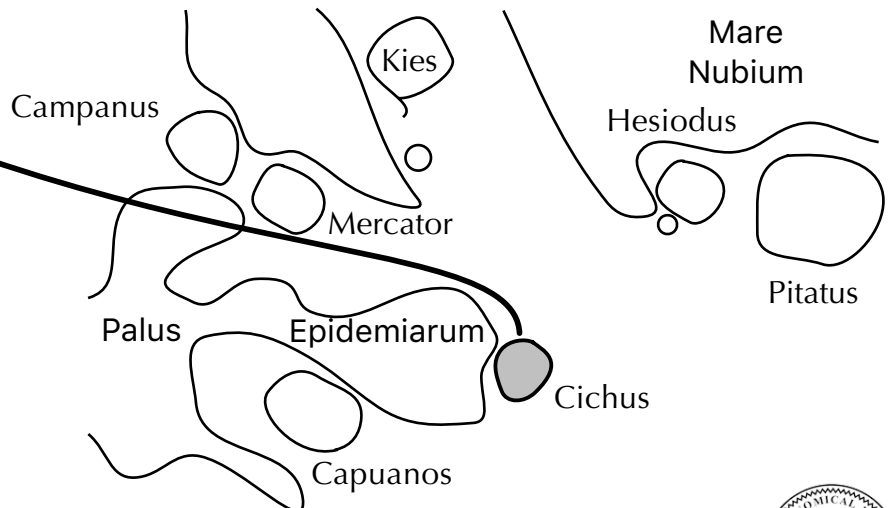

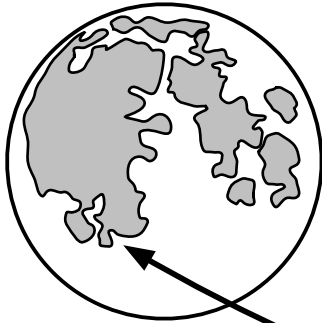

Mare  
Tranquillitatis

Best seen: April 16 and 17; and  
April 29 and 30, 2021.

1855. Some observers, led by the  
renowned observer the Reverend  
Thomas William Webb, saw a  
change in their respective  
configurations.

# Lunar Explorations: 8. Cichus

Best seen: April 4 and April 22,  
2021.

1859. Rev. Webb thought Cichus  
had enlarged its diameter since  
Schroeter observed it some  
seventy years earlier.
