Find a Location for Stratus 7 and Mount It

Select either the Dash Mount method or the Vent Mount method for your Stratus 7. You will need a Phillips-head screwdriver to complete the installation.

Dash Mount Method:

i. Make sure the interior temperature of your vehicle is at least 60°F to install the Dash Mount. Install the vent clip provided with the Magnetic Mount Antenna outside your vehicle, on a clean and dry horizontal surface, far from other antennas. Choose the location for the antenna according to your type of vehicle. Center it between the left and right sides, and away from other antennas.

ii. Route the antenna cable to the antenna and press the antenna cable into the silver connection hole. The signal reception is good, press and hold to scroll to and highlight Signal. Press the Select button to change Signal. The Satellite and Terrestrial bars show the strength of the signal being received. If not, be sure that you have mounted the antenna on the outside of the vehicle, as shown in step 2, and that the vehicle is parked outdoors with a clear view of the sky.

iii. The Satellite and Terrestrial bars show the strength of the signal being received. If not, be sure that you have mounted the antenna on the outside of the vehicle, as shown in step 2, and that the vehicle is parked outdoors with a clear view of the sky.

iv. Include enough slack in your routing to accommodate open doors or the hood lid. Coil any excess cable in a hidden location and keep it away from any vehicle pedals or controls.

v. The Stratus 7 User Guide contains information about the performance of various SiriusXM receivers, including the SiriusXM Satellite Radio. Visit www.siriusxm.com signalchart for more information. This guide will help you plan the antenna location. These instructions are for a sedan or coupe where the antenna is mounted above the front windshield. Connect the Audio

Plug in the power cord to the AC outlet and connect the SiriusXM Antenna. Make sure that the SiriusXM Antenna is far away from metal objects and other electronic equipment.

Change the Audio Source

You can choose to listen to the SiriusXM Audio channel through your vehicle’s stereo system. You can also listen to the auxiliary input source. To change the audio source, press the Select button to select the FM channel.

Select FM Channel

You should hear Sirius channel 184 through your vehicle’s stereo system. The installation is complete when you hear the Sirius audio. Press to preview and tune channel number.

Increase the Signal Strength

You can increase the separation between the SiriusXM equipment and the affected radio or television. Consult the dealer or an experienced radio/TV technician for help.

Important Legal Information

FCC Statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the installation instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
-Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.
