

ctrl+z

forgive and get your life back.

CTRL+Z: the combination of keys you hit when you make a mistake and you want to erase it.

Undo. Backspace. Do over.

Wouldn't it be great if life had an Undo function? What if you could go back and not make those mistakes? What if the sins of your past no longer haunted you? While we can't undo the past, forgiveness given and received can undo the paralyzing power of the feelings connected to it. Forgiveness is life's CTRL+Z. Discover how to use it in this two-part series.

Series begins Saturday October 2
