GUARANTEED ANALYSIS

Total Nitrogen (N).....	1.8%
0.1% Ammoniacal Nitrogen	
1.6% Water Soluble Nitrogen	
0.1% Water Insoluble Nitrogen	
Available Phosphoric Acid (P ₂ O ₅).....	2.5%
Soluble Potash (K ₂ O).....	0.2%

Derived from: Squid Hydrolysate stabilized with Phosphoric Acid, Red Crab (chaceon quinquedens)

This product also contains 2.0% Lactic Acid for product stability and food safety.

GENERAL INFORMATION: Pinch is a concentrate consisting of squid hydrolysate and red crab. The crab is uniquely processed and then partially dehydrated in order to reduce the presence of filter-plugging shells, allowing Pinch to be filtered to 100 mesh (149 microns) prior to delivery. Red crab is listed as a Good Alternative by Monterey Bay Aquarium's Seafood Watch, making this a great product for the Eco-conscious. Pinch is for use in soil and water run applications. It is intended to be a supplement to a fertility program. Always monitor crop nutrient needs and responses with a soil, leaf tissue and irrigation water analysis program.

DIRECTIONS FOR USE

This product is not intended for foliar applications.

SOIL APPLICATIONS: Soil apply via mechanical application through direct spray or injection to the soil in a banded or side dress application. This product must be diluted with water before application. Mix in clean tank with sufficient water for adequate mixing and coverage of target areas. Do not store diluted material.

WATER RUN APPLICATIONS: This material may be water run via drip, microsprinklers, flood, and/or furrow. When applying this material via a fertigation system, continue to operate the system 30-60 minutes after material has completely injected to flush clean water through the system.

DIRECTIONS FOR USE CONTINUED....

PRECAUTIONS:

- Avoid contact with fruit and produce intended for human consumption.
- As a natural product, separation is expected - agitate prior to use.
- Do not store diluted material.

COMPATIBILITY:

This product has an acidic pH and may lower the pH of tank mixes. It is compatible with many commonly applied nutrients and crop protection products. Contact a Source To Source representative for a list of compatible mixes. Jar test for compatibility prior to mixing with any pesticides, fertilizers or fertilizer blends. For unfamiliar mixes, an appropriate amount of the final mix should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities.

STORAGE AND SHELF LIFE:

Store in a sealed container in cool, dry location, at temperatures above freezing. Do not store diluted material.

SUGGESTED APPLICATION RATES & TIMINGS

TREES & VINES: Apply 2-15 gallons per acre, at spring root flush and fall root flush, or other times as needed, for a growing season maximum of 45 gallons per acre.

VEGETABLES & ROW CROPS: Apply 2-15 gallons per acre, at planting and mid-seasons growth, or other times as needed, for a growing season maximum of 45 gallons per acre.

NOTICE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. Buyer shall assume all risks of use including, but not limited to crop injury, ineffectiveness or other unintended consequences as may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of the seller. In no case shall Source to Source be liable for consequential, special or indirect damages resulting from the use or handling of this product. Always refer to the label on the product before use.
