Multiple Choice Questions (use the answer grid).

- Which of the following would be used as a point estimate for the population mean μ ?
 - σ
 - X/n
 - \bar{X}
 - s
- A sample mean is the best point estimate of
 - the population standard deviation.
 - population median.
 - population mean.
 - the sample standard deviation.
- A sample standard deviation is the best point estimate of
 - the population range.
 - population skewness.
 - population mode.
 - population standard deviation.
- A sample of 20 is selected from the population. What is the number of degrees of freedom used to determine the appropriate critical t-value?
 - 20
 - 19
 - 21
 - 25
- The z-value associated with a 90% level of confidence is:
 - 1.96
 - 1.645
 - 2.33
 - 2.575
- The distribution of Student's t is
 - symmetrical.
 - negatively skewed.
 - positively skewed.
 - a discrete probability distribution.
- The distribution of Student's t has
 - a mean of zero and a standard deviation of one.
 - a mean of one and a standard deviation of one.
 - a mean of zero and a standard deviation that depends on the sample size.
 - a mean that depends on the sample size and a standard deviation of one.
- Student's t is used when
 - the sample is more than 30 observations.
 - the sample size is $\leq 5\%$ of the population.
 - the population standard deviation is unknown.
 - any time.
- A student wanted to quickly construct a 95% confidence interval for the average age of students in her statistics class. She randomly selected 9 students. Their average age was 19.1 years with a standard deviation of 1.5 years. What is the best point estimate for the population mean?
 - 2.1 years
 - 1.5 years
 - 19.1 years
 - 9 years
- Mileage tests were conducted on a randomly selected sample of 100 newly developed automobile tires. The average tread life was found to be 80,000 kilometres with a standard deviation of 5,600 kilometres. What is the best estimate of the average tread life in miles for the entire population of these tires?
 - 80,000
 - 5,600
 - (80,000/100)
 - (5,600/100)
